Let's Talk Service

CAR TALK, WITH HOLLY SROKA
Sroka's Service Center

Whenever we have a customers wheels off, especially if they are aluminum, we clean the white/tan corrosive buildup off the wheel and the brake rotor or drum mating surface with a sander. When the wheel is reinstalled onto vehicle, cleaning allows the wheel to sit flat, and run "true" while spinning. Secondly, even if the lug nuts are torqued, if this corrosive buildup is not removed, over time it will disintegrate, leaving a gap and the lug nuts loose, and that's not good news.
