SUB*ZERO

Maintenance Mechanic 2nd Shift (Monday-Thursday)

Are you a maintenance professional who thrives on working in a highlyautomated manufacturing environment utilizing state of the art equipment (lasers, robotics, AGVs, vision systems) in a modern air conditioned facility, with company paid training to keep your skills current?

Do you value a company that makes safety a part of their culture, not just another graph on the wall?

Do you believe in a maintenance program that values predicting and preventing maintenance issues as much as troubleshooting and repairs?

Would you enjoy a second shift Monday through Thursday (2pm-12am) schedule with paid breaks?

If so, Sub-Zero, Inc. may have the perfect opportunity for you. We are looking for maintenance professionals with the following experience and knowledge to work in our Fitchburg Built-In Refrigeration facility:

- Associates degree in Industrial Maintenance or 3 5 years of equivalent manufacturing maintenance experience.
- · Knowledge of and ability to interface and troubleshoot with a variety of PLC's including Allen Bradley PLC's, 500, 5000, Flex Drives.
- Experience with manufacturing enterprise systems (MES).
- Strong understanding of OSHA principles.
- Experience with CMMS programs (MAXIMO preferred).
- Microsoft Office Suite programs (Word, Excel, Outlook).

To apply, visit the Career Page of our website at http://www.subzero-wolf.com Successful Candidates may be eligible for a sign on bonus of up to \$1500! Apply today for immediate consideration. 174666

All positions are either direct hire or temp-to-perm with our excellent client companies.

The Clinton Community School District

Responsible for performing many diverse functions; in general we are seeking a responsible employee to apply proper engine technical skills in inspection, diagnosis, failure analysis, disassembly and assembly, and operating performance tests. Identify the problem and cause of failure through logical troubleshooting steps, determine corrective action through inspection. Repair and troubleshoot engines such as Cummins, Detroit Diesel, John Deere and Perkins. Repair and maintain mobile manipulators. Service and repair all makes and models of diesel generator sets. Inspect, start up, repair, service and load bank test per requirements on equipment. Troubleshoot equipment and generator components including alternators, wiring harnesses, safety devices, battery systems, generator controls, electronic engine controls, etc. Work on continuous improvement efforts within the Fork Truck Repair Department. The ability to lift weights up to 65 lbs. and operator heavy equipment safely are essential job functions.

QUALIFICATIONS: Must have the ability to work independently and as part of a team, analyze situations and conditions. implement solutions and work under deadline pressure. Must have effective interpersonal skills and the ability to communicate with all personnel. · Ability to read and follow complex specifications on work orders and procedures, perform arithmetic calculations and follow verbal instructions • Two Year Technical Diploma in an accredited Diesel & Heavy Equipment Technician program or equivalent from technical school; or minimum five years related experience; or equivalent co education and experience Seeking an energetic person to perform the role of Heat Treat Operator. Summary of job tasks: interpret production schedules and work orders to determine processing sequences, furnace temperatures, and heat cycle requirements for parts to be heat-treated. Review furnace load sheet from previous shift to determine current furnace load status and monitor throughout shift. Prepare heat treat furnace, ensure orientation of load and remove shims. Record times and temperatures of parts removed from furnaces to document that parts have attained required temperatures for specified times. Determine heat cycles and temperatures needed to attain specified part hardness, toughness, and ductility, using heat-treating charts and knowledge of methods, equipment and metals. Load and unload parts into furnaces according to established load sheet instructions, keeping in mind support and furnace uniformity. Remove parts from furnaces after specified times, cool, air dry or quench parts as needed. Perform quench tank operations according the established guidelines and experience. Light furnaces, adjust furnace controls to maintain temperatures and heating times, using thermal instruments and charts, dials and gauges of furnaces, monitor and record temperature readings. Perform safety check and preventative maintenance on forklifts and stamping equipment. Communicate production and equipment problems to appropriate personnel. Work on continuous improvements efforts within the Heat Treat Department Review of applications will begin immediately and continue until the position is filled.
