AUTO ALMANAC

DRAWING BOARD
2015 Mercedes-Benz S-Class coupe:
 The CL-Class two-door has been canceled and replaced by a sleek new coupe companion to the equally new S-Class sedan. The "Base" S550 4Matic runs with a twin-turbocharged 449-horsepower 4.7-liter V8, while the 585-horsepower S63 AMG 4Matic uses a 5.5-liter twin-turbo V8. The range- and power-topping S65 AMG ups the performance with a 621-horsepower V12. Prices start at \$120,000.

WHAT'S UP, AUTO DOC?

Is an electric car right for you? A growing number of people would probably say yes if it weren't for a few fundamental knocks, relative to internal-combustion vehicles. Sadly, these have almost nothing to do with the way electric cars ride and

ride, which is really as good as any internal combustion vehicle. And they're usually much quieter. The first knock is that they, as yet, don't go very far on a charge and the recharge takes hours, which means you're stuck for a while. This largely relegates electric cars to local duty where you can complete all your daily errands and get back home without running out of juice. Plug in for the night and start all over again. You would need to weigh whether this is worth never having to go to the gas station again as well as the extra cost for an electric vehicle, which is about double that of a comparable (well-equipped) four cylinder compact. But the biggest knock of all is selection. Of the 250 or so different vehicle nameplates available to buyers, there are only a few electrics, most notably the Nissan Leaf. Until that increases to meet the practical needs of daily transportation, electric cars will continue to be fringe players.
