## Images Of Australia On Display At The Evelyn Burrow Museum

Sydney Opera House

Dozens of photographs by Australian photographer Anatole Zurrer are on display at The Evelyn Burrow Museum on the campus of Wallace State Community College. They celebrate everything that is Australia, from photos of the outback to city scenes, landmarks and everything in between.

Zurrer has been a photographer for 30 years. His work came to the attention of the Burrow Museum when his son Tim played baseball for Wallace State.

In the exhibition, numerous images of Sydney are featured, including a variety of shots featuring the Sydney Opera House in day and night time and under different lighting conditions, including a vivid laser light display.

The exhibition also shares familiar images of Australian landscapes, as well as refreshing seascapes and nature studies that are sometimes overlooked for the stark, red-clay images from the outback.

Zurrer's photographs will be on display through the summer and can be seen during regular campus hours, Monday through Friday. Admission is free of charge. For more information about The Evelyn Burrow Museum, visit [www.burrowmuseum.org](http://www.burrowmuseum.org) or call 256.352.8457.

The anticonvulsant medication gabapentin-already a useful part of strategies to control pain after surgery-also effectively reduces the common complication of postoperative nausea and vomiting (PONV), reports a study in Anesthesia & Analgesia.

Blood loss and the need for a blood transfusion are major concerns in joint replacement surgery, but a new use for an old drug is proving affective in reducing blood loss and transfusion rates, according to a study at Hospital for Special Surgery (HSS). The drug, tranexamic acid, or TXA, has been for decades in heart surgery, to treat hemophilia and to stop excessive uterine bleeding.

The U.S. Food and Drug Administration has approved Zepatier (elbasvir and grazoprevir) with or without ribavirin for the treatment of chronic hepatitis C virus (HCV) genotypes 1 and 4 infections in adult patients. Hepatitis C is a viral disease that causes inflammation of the liver that can lead to diminished liver function or liver failure. Most people infected with HCV have no symptoms of the disease until liver damage becomes apparent, which may take several years. Some people with chronic HCV infection develop cirrhosis over many years, which can lead to complications such as bleeding, jaundice (yellowish eyes or skin), fluid accumulation in the abdomen, infections or liver cancer. According to the Centers for Disease Control and Prevention, approximately 3 million Americans are infected with HCV, of which genotype 1 is the common and genotype 4 is one of the least common.

**BLUE TAG SPECIALS:**  
We have HUNDREDS of non-advertised items marked down throughout our entire store. More savings passed on to our customers. Just look for blue tags on the shelves.

**NO LIMITS:**  
Our competitors also have advertised specials. The difference is, in most cases, they have a limit on how many of an item you can buy at the sale price...we don't have any limits to family shoppers.

Multitudes of churches are teaching more for Satan than Christ. The Messiah is The Holy Truth (Jn 14:6), yet they only testify of Him (Jn 5:39) and do not teach what Christ (Mt 16:22-24) or The Bible gives about sinners (Jn 5:14, 8:11, Rom 3:25, Heb 6:6, 10:26-31, 1Jn 3:8-9) or that Christ did not change the law (Mt 5:17-19, Heb 4:1-16, 13:8). They even close their prayer with Amen, the name of an ancient Egyptian sun god, meaning the hidden one. So Be It! Ron & Jeri

**BLUE TAG SPECIALS:**  
We have HUNDREDS of non-advertised items marked down throughout our entire store. More savings passed on to our customers. Just look for blue tags on the shelves.

**NO LIMITS:**  
Our competitors also have advertised specials. The difference is in most cases, they have a limit on how many of an item you can buy at the sale price...we don't have any limits to family shoppers.
