**THANK YOU! THANK YOU! THANK YOU!**

We don't even know how to begin to thank everyone that showed up at our place Tuesday after the storm hit Monday night. As we left our place Tuesday morning for Deb to have surgery we didn't know how we would ever get things cleaned up. We returned home the following day to find all the trees cut up & fences fixed. There were no trees on the house or shed. What a group of friends, neighbors, & strangers. They jumped in & got to work.

*Thank you doesn't seem to be enough!  
May God richly bless you for your  
act of kindness.*

## Heat Stress Considerations

**PIGS:**  
**Signs:** Panting, open-mouth breathing, high rectal temperature (>104°F).  
**Help:** Offer shade, fans, plenty of drinking water, sprinklers that provide large droplets. Do not use sprinklers continuously (Cycle 2 minutes on 2 minutes off).

**SHEEP & GOATS:**  
**Signs:** Rapid breathing rate, panting, weakness, high rectal temperature (>104°F).  
**Help:** Offer shade & drinking water. Use rubbing alcohol on wool-less areas. DO NOT SPRAY SHEEP WITH WATER, if wool becomes wet, air cannot flow properly over the skin for evaporative cooling. For goats run cool water over back of head.

**CATTLE:**  
**Signs:** Panting, open-mouth breathing, excessive salivation, lack of coordination, trembling, high rectal temperature (>104°F).  
**Help:** Offer shade, fans, plenty of drinking water, sprinklers that provide large droplets. Sprinklers throwing out a mist only contribute to humidity.

**HORSES:**  
**Signs:** Profuse sweating, rapid breathing, rapid heart rate, high rectal temperature (>104°F).  
**Help:** Offer shade, fans, run cool water on legs, offer frequent small amounts of drinking water.
