The Warm and **Cozy Home**

The dark days of winter can really do a number on your well being. Shorter days will trigger the blahs, freezing temps spark the sniffles. So we put together a list of ideas that will turn your home into a comfy home. Here's how to create a brighter and warmer home without using more energy or cranking up the thermostat. Clean dirty fixtures and dusty bulbs to make your home appear 30% brighter without turning on more lights. Seal sneaky air leaks. It's not just window and door leaks killing your cozy vibe. Don't forget to plug gaps around recessed lights, electrical boxes, and wall outlets. Use a lit incense stick or scented candle to hunt down drafty spots while leaving behind a cozy scent. Replace your traditional gas or wood

heated indoor air and send it up - and out the chimney. A gel fireplace insert is an ecofriendly option that produces a burning fire without gas, wood, electricity, or even a chimney. It is also smoke free and emits fewer allergens than a wood fireplace. Some options crackle like the real things too! Change your HVAC filters every couple of months to keep dust from accumulating. Some indoor plants will also help. They can remove the nasty vapors emitted from household cleaners, paints and dry cleaning while some plants increase humidity. All these things should help keep your home warm and cozy for the upcoming winter months.

fireplace. They both pull out
