*An Easy Advance (EA) is a loan secured by your tax refund and is offered by Republic Bank & Trust Company, member FDIC, to eligible taxpayers. There are no fees or interest associated with the EA. Most church Christian's days and ways are not The Bible times and laws, that most will gladly agree. Yet The Bible reveals it was given to the beast to think to change times and laws (Dan 7:25), not Christ. The Holy Bible and history reveal times and laws were starting to be changed over 1900 years ago. Forced, even by death upon the people, to believe Christ changed the Mosaic law and gave liberty to Christians (Mt 5:17-19, Heb 13:8). Yet it took some 800 years before being accepted as truth. When Elohim's times and laws are denied and changed times and laws by man accepted, it is vain worship (Mt 15:9). Roman dictators kept days for pagan gods, Constantine and the Nicene council brought forth most of these days and a lot more has been added since. So Be It! Ron & Jeri

Happy 25th Birthday In Heaven

Zac Sullins
January 18, 1992 ~ November 3, 2013

IN LOVING MEMORY

It broke our hearts to lose you, but you did not go alone. A part of us went with you, the day God took you home. If tears could build a stairway, and heartaches make a lane, we'd walk our way to Heaven and bring you back again. In life we loved you dearly, in death we love you still. In our hearts you hold a place no one could ever fill.

FOREVER LOVED

FOREVER MISSED

Mothers who purchased antidepressants at least twice during pregnancy has a 37- percent increased risk of speech and/ or language disorders among their offspring compared to mothers with depression and other psychiatric disorders who were not treated with antidepressants, according to new research published in JAMA Psychiatry. The speech/language disorders included expressive and receptive language disorders and those involving articulation of sounds. Selective serotonin reuptake inhibitors (SSRIs) such as fluoxetine, citalopram, paroxetine, sertraline, fluvoxamine, and escitalopram cross the placenta and enter the fetal circulation. They are also increasingly used during pregnancy.

Approximately 1.9 billion adults are overweight and 600 million are obese worldwide. Identifying effective long-term treatment strategies for overweight and obesity is of paramount importance. The U.S. Food and Drug Administration (FDA) has approved 5 weight loss drugs (orlistat, lorcaserin, naltrexone-bupropion, phentermine-topiramate, and liraglutide) for long-term use in obese (body mass index (BMI)>30) or overweight (BMI>27) individuals with at least one weight-associated condition (type 2 diabetes, hypertension, hyperlipidemia). The researchers found that a median 23 percent of placebo participants had at least 5 percent weight loss vs. 75 percent of participants taking phentermine-topiramate, 63 percent of participants taking liraglutide, 55 percent taking naltrexone-bupropion, 49 percent taking lorcaserin, and 44 percent taking orlistat. All active agents were associated with significant excess weight loss compared with placebo at 1 year: phentermine-topiramate, 19.4 lbs.; liraglutide, 11.7 lbs.; naltrexone-bupropion, 11 lbs.; lorcaserin, 7.1 lbs.; and orlistat, 5.7 lbs. Compared with placebo, liraglutide and naltrexone-bupropion were associated with the highest odds of adverse event-related treatment discontinuation.
