### **Message From James Vacca** **NYC Councilman 13th District**

#### **REMINDER: ALTERNATE SIDE PARKING CALENDARS AVAILABLE**

Every year my office receives alternate side parking rules suspension calendars to distribute to the public. The 2017 calendars are here! Please stop by my office at 3040 East Tremont Avenue, Room 104 to pick one up. Alternately you can call my office at 718-931-1721 to request that one be mailed to you. These handy calendars tell you which days alternate-side parking rules are suspended so you know what days you don't have to move your car.

#### **FREE EXERCISE CLASSES @ THE PELHAMBAYLIBRARY**

The Pelham Bay Library is hosting two free "Stay Well" exercise classes for adults. Volunteers trained by the Health Promotion Services unit of NYC's Department for the Aging will lead participants in a well-balanced series of exercises for all ability levels. No special clothing or equipment is necessary. The classes will be held on Tuesday, January 24th and Tuesday, January 31st, from 10:30 AM to 11:30 AM at the library, which is located at 3060 Middletown Rd. For more information, please reach out to the library at 718-792-6744.

#### **INTERNSHIP OPPORTUNITY IN NYC GOVERNMENT**

I am currently seeking motivated college and graduate students to fill several internship positions in my district office. Interns will gain first-hand experience of local government issues while assisting in all aspects of a busy New York City Council office. All majors are welcomed, but students with an interest in government or politics are strongly encouraged to apply. Prospective interns should have a positive attitude, be comfortable interacting with constituents, flexible and willing to learn. Duties include staffing events with the Council Member, assisting staff with cases, policy research and other tasks as assigned. Internships are unpaid. To apply, e-mail a cover letter and resume to Stephen Nuzzo at [snuzzo@council.nyc.gov](mailto:snuzzo@council.nyc.gov). For more information, call (718) 931-1721.

He has developed a 17-base mycobacterial expression system, efficient phage-based tools to genetically manipulate mycobacteria, to diagnose and perform drug susceptibility of M. tuberculosis, and to predict response to treatment in tuberculosis patients. He is also actively working on finding ways to identify and characterized persisters, bacteria which are drug sensitive but can survive lethal concentration of bactericidal antibiotics.
