PURVEYORS OF FINE MACHINERY®, SINCE 1983!

- ALMOST A MILLION SQUARE FEET PACKED TO THE RAFTERS WITH MACHINERY & TOOLS
- 2 OVERSEAS QUALITY CONTROL OFFICES STAFFED WITH QUALIFIED GRIZZLY ENGINEERS
- HUGE PARTS FACILITY WITH OVER 1 MILLION PARTS IN STOCK AT ALL TIMES
- 24 HOUR ORDERING BY PHONE OR ONLINE • MOST ORDERS SHIP THE SAME DAY

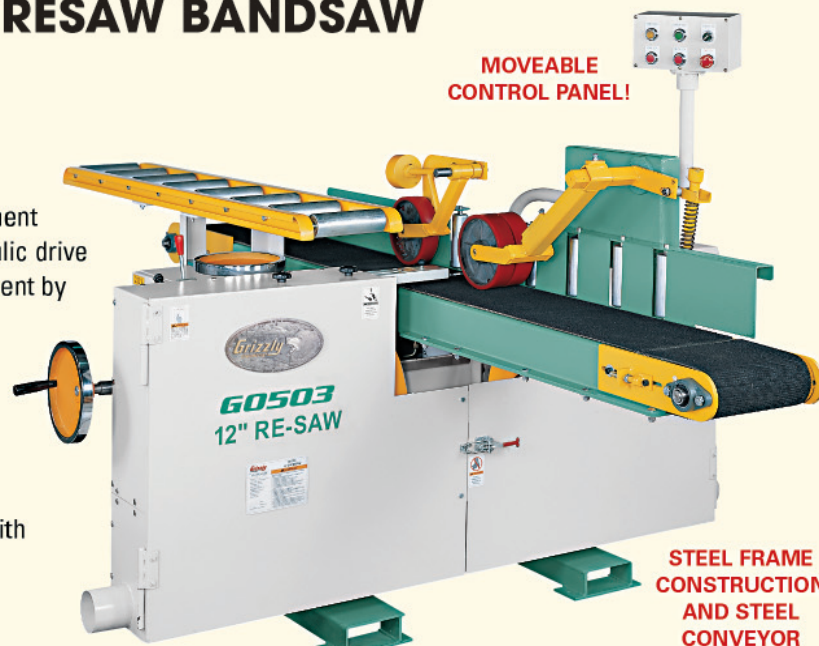

12" HORIZONTAL RESAW BANDSAW

SPECIFICATIONS:

- Main motor: 20 HP, 220V/440V*, prewired 220V, 3-phase
- Amps: 48A at 220V, 24A at 440V
- Hydraulic tank motor: 2 HP, 6A/3A
- Hydraulic pressure: 775 PSI
- Variable feed speed: 32-82 FPM
- Maximum cutting capacity: 12" x 12"
- Blade to conveyor table distance: ¼"-5"
- Saw wheel size: 28"
- Saw blade size: 168" x 1"
- Saw blade speed: 7300 FPM
- Conveyor belt size: 215¾" L x 11¼" W
- Conveyor table: 102" L x 12" W
- Floor-to-table height: 35¾"
- Overall size: 81" W x 65½" H x 108" D
- Approximate shipping weight: 2778 lbs.

FEATURES:

- Two 4" dust ports
- Return rollers
- Adjustable blade guard
- Manual cutting height adjustment
- Variable feed speed by hydraulic drive
- Manual blade tension adjustment by handwheel
- Movable control panel
- Carbon steel guides
- Steel frame construction
- Steel conveyor table
- Rubber conveyor belt
- 8" Cast iron pressure rollers with polyurethane tires

MOVEABLE CONTROL PANEL!

STEEL FRAME CONSTRUCTION AND STEEL CONVEYOR TABLE!

16" DUAL CONVEYOR HORIZONTAL RESAW BANDSAW

SPECIFICATIONS:

- Main motor: 30 HP, 220V/440V*, prewired 220V, 3-phase, 72A/41A
- Elevation motor: ½ HP, 2.2A/1.1A
- Maximum capacity: 16" wide x 10" high
- Blade to conveyor table distance: ¼"-10"
- Blade size: 180" x 1"
- Blade speed: 7300 FPM
- Blade wheel size: 28" x 7/8" thick
- Conveyor belt sizes: 215¾" L x 15¼" W and 215¾" L x 7¼" W
- Variable feed speed: 0-61 FPM
- Feed conveyor table: 106" L x 16" W
- Floor-to-table height: 40"
- Overall size: 85" W x 83½" H x 108" D
- Approximate shipping weight: 4325 lbs.

FEATURES:

- Digital height control for accurate blade positioning within 0.01" (enter the thickness you want and press a button)
- Variable-speed, hydraulically-driven feed and return conveyors
- Powered saw elevation
- Hydraulic blade tensioning with gauge
- Two 4" dust ports
- Adjustable ceramic blade guides
- Massive steel frame construction
- Steel conveyor table
- Steel fence with rollers
- 4" Cast iron pressure rollers w/ polyurethane tires
- Bi-fold doors
- Simple and quick blade changes

ADJUSTABLE CERAMIC BLADE GUIDES

TO MAKE EVERY DOLLAR COUNT— YOU HAVE TO MAKE EVERY CUT COUNT

Selecut® V with **Inline Squeeze**

- For prime lumber cut to length or Precision End Trimming needs, our Selecut®-V uses a Fixed Frame Assembly with a moveable cutting platform to meet your production needs in a limited space environment and is available with our Inline Power-Squeeze Package Alignment system.
- For high-volume automated crosscutting of industrial length stock, our Autocut®-V uses a computerized carriage assembly with PLC controls enabling you to process lumber without an operator present.

Transcut® II Station
from **\$26,999***

Transcut® II Portable
from **\$7,999***

Autocut® V

- For custom manufacturers, our Transcut® II Station will cleanly cut through a unit of hardwood or softwood in less than a minute using generic chain-saw chain and with a precision of +/- 1/16th" or better*.
- For simple crosscutting of EWP or lumber, our versatile Transcut® Portable saws are priced and designed to offer a significantly safer and faster alternative to hand-held chain saws.

We're proud of the fact that HOLTEC pioneered the concept of precise package cutting over 40 years ago. Today our industry's technological and manufacturing advances have enabled us to achieve the fastest cut in the industry and an unmatched precision on every cut. So, if you're considering investing in a package-crosscut saw, consider these facts*:

- At 55 seconds per cut HOLTEC systems cut up to twice as fast as other systems available today;
- With an unmatched precision of +/- 1mm (.040"), HOLTEC systems exceed precision-end-trim tolerances;
- With our own team of dedicated Field Technicians and service vehicles, HOLTEC is the only company that provides you a service response time of 24 hours or less on-site and on-time;
- HOLTEC systems are designed with the highest safety standards in the world, ensuring that your employees are working in the safest environment for package-crosscutting available today;
- Our state of the art Germany manufacturing facilities are ISO-9001 certified, ensuring that you're getting the highest quality manufacturing standards available today;
- HOLTEC has almost 2,000 systems in North America and over 8,000 systems delivered worldwide, ensuring that we'll be here for you in the future as we have been for the last 40 years

WE ENSURE EVERY DOLLAR COUNTS BY ENSURING EVERY CUT COUNTS

**Precision.
Performance.
Production. Profit.**

Perfect for Rig Mat & Truss Stock, L-M's Verticut P4 consistently delivers a P.E.T. cutting tolerance of $\pm 1/32"$ and a trim end finish that is as good or better than conventional trim saws.

*Built to
Provide Service,
NOT Require It*

The Verticut P4 is one great machine in the L-M family of efficient, cost effective package lumber cutters. With 60 years in the business, L-M Equipment has more package cross cut systems in operation than any other manufacturer in North America. We serve customers around the world.

Contact L-M Equipment for more information!

Features include:

- Programmable touch screen
- Automated PLC controls
- Remote starting
- Operator weather protection
- FACT™—Fast Advance Cutting Technology to substantially reduce cutting cycle time.

Every product we manufacture and sell must meet our high standards before being shipped.

Guaranteed Products + Quick Delivery + Proven Experience = Your Success

We also supply Edger Saws, Slasher Saw Bits, Saw Grinders & Lots More!

The better alternative for pallet recyclers
More power, less weight & better durability.

For driving nails 1-3/4" to 2" with diameters .083" to .090", we proudly introduce the new Tech PCN-55M nailer.

After many years of experience working with pallet recyclers, we've designed our new tool with features like a thicker reinforced nose and contact arm for extra durability, and air flow that is optimized to generate more power with less weight - a third to a half a pound lighter than competitive tools.

Our customers also report that the new PCN-55M holds up better in colder winter temperatures.

Although nail pricing is one component when choosing a company, an even greater consideration for us is the nail guns. Being a recycler, wood density varies from softwood to rock hardwood. The Tech 55M handled all materials with ease. It has increased production by approximately 30%. A single individual was able to increase his output from 200 to 300 pallets per day, very impressive. Overall its proven itself as a money maker for the company.

- Reduce knife changes and sharpening costs
- Less downtime = more production time = BIGGER PROFITS
- Extended life for chipper parts such as bolts, knife holders and clamps
- Use less fuel with sharper knives

Bevel Buddy is available at all Authorized Morbark Dealer locations. To find a dealer in your area, go to www.morbark.com/find-a-dealer or call 1.800.255.8839.

Merry Christmas from our family to yours

Pantron Sensors

- Blast through steam, sawdust, & fog
- Not affected by vibration or sunlight
- Through-beam range up to 230 feet
- Eliminates need for compressed air

Need Money Now?

PROBLEM:

You give your customers 30 days to pay...

SOLUTION:

GET YOUR MONEY NOW and still offer credit terms to your valuable customers!

Here's How It Works:

- Invoice today - Get paid today up to 80% on your invoices. The other 20% is paid to you, less our fee, when your customer pays the invoice.
- Flexible fee structure
- You do not incur debt!! This is not a loan
- No application fee and no long term commitments
- Grow your business with the increased cash flow
- Take cash discounts offered by your vendors

Turn Your Invoices Into IMMEDIATE CASH!

Edger Problems?

- Alignment issues?
- Too many banana boards?
- Not cutting as straight as you need?
- Feed roller teeth lost their bite?
- Too many profits going in the chipper?

No need to buy a new edger. Call the edger experts. We'll make your edger run right and make it work for YOU... profitably!

What our customers are saying...

"The best solution for a stubborn edger."

"If your edgerman is busy all day, something's not right."

"From experience I would say having the edger worked on was our quickest, best return on investment we've made! Edger work is both money and time well spent."

Our services include:

- Complete edger box rebuilds
- Custom infeed tables & outfeed beds
- Precision alignment service (mandrel, rollers, in & outfeed and more)
- In-shop tested and run prior to final installation in your mill
- Plus lots more!

Don't let your edger be a drain on your hard earned profits. Call us today and you'll see a big difference in your edger operation in just one week!

PORTABLE YARD SAW

This portable chain saw is for cutting logs or packages of lumber. It is available with electric drive or 20 HP gas engine with centrifugal clutch. It features manual or electric start.

HIGH SPEED CHOP SAW

L-M high speed chop saw is available in standard sizes from 48 to 84 inches in diameter. It features a heavy-duty construction frame and saw ladder.

DECK SAW

Deck saw with sawbars of up to 12 feet in length are used to cut the largest of logs, and are also used to split logs length-ways.

VERTICUT 2000-M

Hydraulic vertical guillotine length stops can eliminate the need for a double even ending unit

STANDARD FEATURES

- Safety guarding
- Operator platform
- "Stellite" inlaid sawbar
- Cut accuracy of +/- .040"
- Automatic chain bar oiling
- Package alignment stands
- Standard models for 16' & 20" packages
- Hydraulically powered sawbar activation through the cut

LS SYSTEM 2000 LOG SPLITTER

- Heavy duty Hydraulically powered splitter using onboard HPU.
- Adjustable travel speed using gear reduction for high torque and low power requirements.
- Splits logs up to 60" diameter by 20ft. long
- 54" vertical adjustment capability for slabs-quartering or sizing to mill capacity.

OPTIONS AVAILABLE

- Laser light saw guide
- Modular package end squeeze
- Modular even ending system
- Automatic strapping system
- Modular infeed/outfeed decks
- Electronic length measurement with digital readout
- Powered carriage positioning

SMART PRODUCTS

Is Your Answer! For Pallet Lumber Recovery and Repair Solutions.

"The Difference is Engineering"

Leasing & Financing Alternatives Available

Dismantlers

One-Man Dismantler

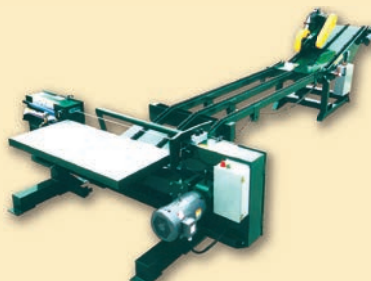

- 52" or 64" capacity
- 10 HP, 3-phase, electric motor standard (2200 FPM blade speed) (single phase available)
- Optional 15 HP, 3-phase (4400 FPM blade speed) electric motor available
- 18 HP gas-powered electric start on Portable Dismantler
- Gear reduction drive
- Self-contained hydraulic blade tensioning
- Low maintenance durable blade guide bearings
- Push button operated table height adjustment

Two-Man Dismantler

Pallet Dismantler System

- 64" capacity **Front Discharge** Dismantler
- Linear accumulating conveyor feeds boards easily to operator of Inclined Power Trim Saw
- Add additional dismantlers for higher production

Portable Dismantler

Notchers

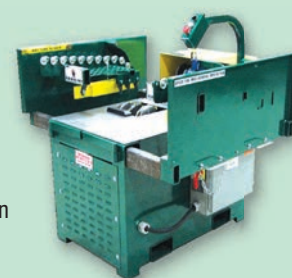

Double Head Notcher

- Two, 20 HP, three (3) phase, electric motors with V-belt driven indexable notching cutterheads
- One-person operation/1,000 double notched stringers per hour
- Notches new or recycled lumber
- 48" to 96" stringer capacity standard
- 9" x 1-1/2" notches, with 18" between notches
- Quick set-up
- Continuous power feed system
- Self exhaust design (useful when notching recycled material)

Single Head Notcher

- 20 HP, three (3) phase, electric motors with V-belt driven indexable notching cutterhead
- One-man operation/500 double notched stringers per hour
- Notches new or recycled lumber
- 72" stringer capacity standard
- Quick set-up
- Continuous power feed system
- Self exhaust design (useful when notching recycled material)

Pallet Prep

- Commonly referred to as the "SmartSaw"
- Smart Saw is **multifunctional**: designed for repair (1 person) or recycling (2 person) operations of BLOCK or GMA/STRINGER pallets
- Standard 10 HP, 3-phase, electric motor with gear reduction drive
- 20' standard **M42 bi-metal** band saw blade
- Air actuated, 3-position, roller table and table extension easily positions pallet for board removal
- Machine provided with **advanced safety measures** in place, including interlock switches for perimeter guarding and cabinet doors
- Improved **canopy guarding**, with front and rear portions that move up and down with the roller table

- Specifically designed to QUICKLY (as a **1-person** operation) cut out damaged boards, including **top and bottom** deck boards, as well as **connector** and **stringer** boards
- Also designed, as a **2-person** operation, to process the disassembly / tear-down of block or stringer pallets for **INCREASED LUMBER RECOVERY**. For block style machine, includes a specially designed **Block Recovery Tool** (or BRT) that **salvages blocks** now being scrapped with other machines and processes

Double End Power Feed Trim Saw

Trim Saws

- Power Feed Trim Saws trim boards 2" thick from 18" - 60" in length on the single end, and 18" - 66" in length on the double end
- Inclined board feed and overhead saw design help eliminate board kickback
- Manual Trim Saw handles boards up to 6" thick and 6" wide
- 18" diameter nail resistant saw blades and 10 HP motors
- Heavy duty steel tube construction
- Multiple adjustable board stops on Single End and on Manual Feed Trim Saws
- Easy blade change
- Easily moved with built-in fork lift pockets
- Right saw head on double end easily adjusts to cut desired board length

Single End Power Feed Trim Saw

Manual Feed Trim Saw

Froedge Machine and Supply in Tompkinsville, KY is looking to fill the following position:

Field Machinery Installer/Fabricator

Froedge Machine is growing and we are seeking an experienced machinery systems installer. Qualified applicants will be able to set, anchor, level, align, and start up our systems. They must be able to read blueprints, supervise rigging, weld, and have a basic understanding of electric and hydraulic systems. They must have the ability to fabricate in the field as needed, without prints. The ability to organize and to oversee projects to completion is required. Effective communication skills are also required, to perform as a liaison with our customers, as well as internally within our company. This job requires travel. A flexible schedule is allowed outside of field installation work, and/or inside shop work is available between field projects.

Our compensation packages include competitive wages and full benefits, including paid vacations and holidays, insurance, and a simple IRA. If you think you have what it takes, please submit your résumé to fmshr@froedge.com. If you have any questions about the position please call 270-487-5891.

Pallet Dip Tank Key Design Features:

- Dip tank is fabricated in 1/8" thick stainless steel, type 304, with external painted enamel mild steel structure.
- Standard pallet carriage for pallet stack up to 114" tall and maximum 2500 lbs weight. Dead packed cut stock can also be dipped.
- Tilting carriage is fabricated in stainless steel and mild steel.
- Tilting carriage has clamp system to insure pallets or lumber is submerged.
- Hydraulic system is used for all mechanical operations.
- Estimated dip cycle for pallets is 4 minutes and is user defined.
- PLC control system with remote control for initiating the dip cycle. Dip time and other parameters are adjustable in the control cabinet display.

Screen USA Introduces The Newest Model To Its Trommel Screen Line-Up

The TROM512 is extremely heavy-duty and offers generous accessibility. Two large hinged doors open on each side to give complete access to the trommel screen and drive system. On this robust screener, once the doors are open you can see the entire drum which can be easily removed by simply pulling it out the side of the machine. This standard feature differentiates SCREEN USA from all other competitors in this price range. In addition to the screen door, complete accessibility to the engine department exists as there are three doors (one on each side) so it is extremely easy to service. Also, the TROM512 was designed with access doors for all bearings so maintenance is easy.

The SCREEN USA TROM512 is equipped with a 3.2 yard hopper, 39" wide variable speed feeder, 5'-0 x 12'-0 trommel screen, and a built-on fines conveyor. An optional built-on overs conveyor is also available. A 60 HP CAT Engine is at the heart of the machine. This trommel screen is offered both on wheels and on tracks. "We anticipate the track-mounted trommel to be our #1 seller," according to owner Rick Cohen. "As for price, SCREEN USA is selling FACTORY Direct to eliminate the typical 20%-25% dealer mark-up. This allows us to offer the best quality at a considerable discount."

For more information, contact Screen USA Inc. at 770-433-2440 or e-mail rick@screenusa.net.

NEW HFP150 COMPACT FIREWOOD PRO From HAHN MACHINERY INC.

An affordable firewood processing attachment for those who use a lot of firewood but don't need the production capacity offered by the larger, more expensive commercial units.

Designed for use with most mid-sized and larger skid steer loaders, the new HFP150 Compact weighs 1700 lbs and requires a 15 gpm hydraulic flow.

Like its big brother, the HFP160 Firewood Pro commercial processor, the new HFP150 Compact can pick up a log up to 15" in diameter off the ground or deck, cut it into firewood lengths ranging from 12" to 20", and split those blocks into 2, 4, or 6 pieces with all functions being performed by one person from the comfort and safety of the loader's cab.

Please call **800-483-8825** or email info@hahnmachinery.com for a free DVD, complete specifications, and pricing.

Watch Hahn HFP 150 Compact online:
www.HahnMachinery.com

With the HFP150 Compact, the logs roll down the processor's forks into the machine's unique "shuttle trough" which carries the log up to the splitting wedge in 24" increments. Once the log is advanced to the cutting position, the trough retracts and a high speed hydraulic chainsaw cuts the firewood block. The block drops into the splitting trough and, as it's being split, the "shuttle trough" is carrying the next log segment in for cutting. The cycle is repeated until the entire log has been reduced to cut and split firewood.

Simonds Saws Are The Best!

For over 180 years Simonds has thrived in the saw business by manufacturing the best saws in the industry.

Simonds Trademark Series Inserted Tooth Saws are produced using Nickel Alloy plate that is processed in our new heat treat facility. Our new on-site heat treatment is producing plates with a consistent hardness and uniform flatness that is not available from 3rd party plate suppliers. Simonds' saws keep maintenance costs down, maximize saw run time and add profit to your bottom line.

The Trademark Series Saw features:

- Finest Quality Nickel Alloy plate manufactured in Big Rapids, MI.
- Precision Laser Cutting and CNC milling
- Computer-controlled spin tester checks for vibration and run out

We have the most experience in the business manufacturing saws. We make the best — And now they just got better!

Simonds new saw plate heat treat facility enables us to deliver the flattest and toughest saws in the business!

HOT ON THE MARKET!

Model 095 Automated Bench

Simonds International Corp announces another innovation in filing room performance. The new model 095 Automated Bench improves filing room productivity for bandsaw mills. The 095 AB improves on the successful model 090 and incorporates a touch screen control panel that allows the filer to perform leveling and tensioning tasks faster. It will level and tension saws up to 15" wide and up to 65' long. The design of the 095 allows the filers to load saws onto the machine in a more efficient manner and has many standard features that were previously optional.

The machine performs all scanning via a contact sensor that has been proven to be more accurate than a tested optical laser measurement device. The measurements made via the sensor are fed into the computer, the machine performs all calculations, adds the appropriate back, tension and tire line to the band. It simultaneously levels and tensions the saw while measuring to .0004" across the entire area of the saw – length and width. The touch screen is large and can be operated even while wearing gloves.

"The Learn Mode on the 095 AB allows the filer to load a properly leveled and tensioned saw and the machine will measure, document and "learn" the bench work specs such that it can be stored and reused on subsequent runs. The filer can duplicate the specs on all saws by simply recalling the program stored in memory," said Ray Eluskie, Product Manager of Simonds International.

Simonds was founded in 1832 and is the leading supplier of cutting solutions for the North American wood industry. For more information, visit <http://www.simondsint.com> or call 978-424-0100.

Mobile Mulch Coloring System

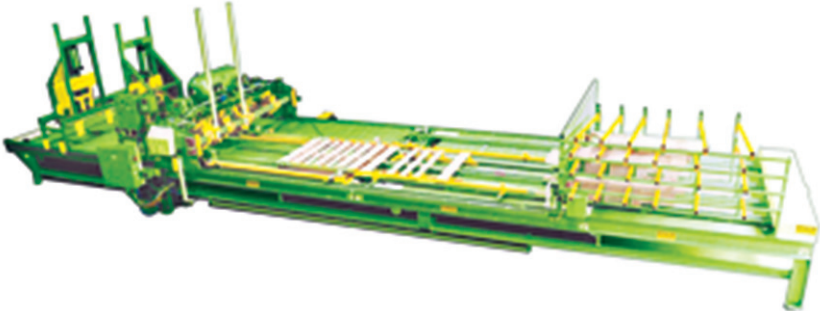

Amerimulch®, a member of the ChromaScape® family of brands, recently released its new MobileTrom™ coloring system. This is a unique and innovative piece of equipment based on the mobility, inclusive power unit and production capacity. The simplicity of the ColorTrom® is now available in a self-contained, portable unit. If you are looking to enter the color-enriched mulch industry, or simply expand your current operation, and if 100 yards per hour hits your production target, the MobileTrom is the right equipment for you! It is an attractive option to handle the challenges of multiple sites with the versatility to meet all of your manufacturing needs. It comes with the Amerimulch® commitment of complete customer satisfaction and Real Tangible Value®.

Amerimulch® provides landscape coatings and equipment for the production of profitable, in-demand color-enriched mulches. Its colorants are formulated for superior bonding, coating and coverage and its equipment is designed for producers who want simple, effective, high-volume production.

Pallet Nailing System

The brand new Universal Nailing System In-line Nailer for serious stringer pallet production is now available. The nailer produces 1,200 pallets per day, up to a standard size 64" x 84" pallet as its basic design. However, Universal will design the system to meet your exact production specifications. It uses less air controls than others on the market and eliminates the use of hydraulic fluid for operation. The gantry is powered by a 10 HP motor; the stacker by a 10 HP motor; the stringer advance by a 5 HP motor. Hard limit switches and push buttons are used to control the system. The system is designed to be a two or three man operation.

Basic features include 4-runner configuration, fully automatic stacker, 10' outfeed rollers, PLC controlled, with no pneumatic switches. This system is engineered to be your "next step up" in a nailer with better smoother performance on recycled and new lumber. Our 24 hour service line is available for easy troubleshooting.
