HAPPY NEW YEAR

2016

The proof is in the product

The Rotochopper FP-66 takes high-volume wood recycling to a new level, outperforming bigger grinders while minimizing fuel costs and maintenance downtime. Best of all, the FP-66 offers the same precision grinding built into every Rotochopper, so you get better mulch, fuel, or bedding, at a lower cost per ton or cubic yard.

How can the FP-66 maximize the value of your wood waste? Contact us to learn more.

320-548-3586 www.rotochopper.com

The Wood-Mizer quality you love. The convenience you need.

TO MAKE EVERY DOLLAR COUNT— YOU HAVE TO MAKE EVERY CUT COUNT

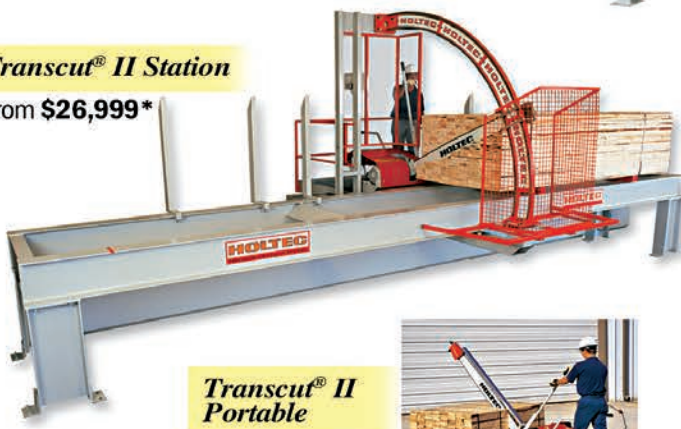

Selecut® V with **Inline Squeeze**

- For prime lumber cut to length or Precision End Trimming needs, our Selecut®-V uses a Fixed Frame Assembly with a moveable cutting platform to meet your production needs in a limited space environment and is available with our Inline Power-Squeeze Package Alignment system.
- For high-volume automated crosscutting of industrial length stock, our Autocut®-V uses a computerized carriage assembly with PLC controls enabling you to process lumber without an operator present.

Transcut® II Station

from **\$26,999***

Transcut® II Portable

from **\$7,999***

Autocut® V

- For custom manufacturers, our Transcut® II Station will cleanly cut through a unit of hardwood or softwood in less than a minute using generic chain-saw chain and with a precision of +/- 1/16th" or better*.
- For simple crosscutting of EWP or lumber, our versatile Transcut® Portable saws are priced and designed to offer a significantly safer and faster alternative to hand-held chain saws.

We're proud of the fact that HOLTEC pioneered the concept of precise package cutting over 40 years ago. Today our industry's technological and manufacturing advances have enabled us to achieve the fastest cut in the industry and an unmatched precision on every cut. So, if you're considering investing in a package-crosscut saw, consider these facts*:

- At 55 seconds per cut HOLTEC systems cut up to twice as fast as other systems available today;
- With our own team of dedicated Field Technicians and service vehicles, HOLTEC is the only company that provides you a service response time of 24 hours or less on-site and on-time;
- Our state of the art Germany manufacturing facilities are ISO-9001 certified, ensuring that you're getting the highest quality manufacturing standards available today;
- With an unmatched precision of +/- 1mm (.040"), HOLTEC systems exceed precision-end-trim tolerances;
- HOLTEC systems are designed with the highest safety standards in the world, ensuring that your employees are working in the safest environment for package-crosscutting available today;
- HOLTEC has almost 2,000 systems in North America and over 8,000 systems delivered worldwide, ensuring that we'll be here for you in the future as we have been for the last 40 years

WE ENSURE EVERY DOLLAR COUNTS BY ENSURING EVERY CUT COUNTS

Are You Ready for the Latest Market Changes?

Hurdle Sawmills are *EASY* to INSTALL, OPERATE & MAINTAIN

- Proven in over 450 installations!
- Simple design with over 40 years of refinements and improvements
- A Hurdle mill followed by a resaw is an efficient, low cost, low maintenance replacement for an expensive grade bandmill installation
- For crosstie and pallet mills, our 2HB mill sets the standard for production
- Complete with 36" or 40" Challenger carriage, log deck, bar or chain log turner, offbearer belt, sawyer's cab, carriage drive, and setworks
- Optional Hurdle Vertical Edger eliminates expensive edgerman and downstream edger equipment
- Optional computer setworks, cant turners, hammer dog, top-saw, and more
- **Go to www.youtube.com/HurdleMachineWorks to see it in action!**

60' Platform - 4HB Carriage
Perfect for sawing timbers or mat material

48' Platform - 3HB Carriage
Most versatile mill
Cut grade, ties, or square up logs for a resaw

40' Platform - 2HB Carriage
The standard for crosstie mills

A Hurdle Complete Mill Package will fit *ANY* size operation!

Simonds Saws Are The Best!

For over 180 years Simonds has thrived in the saw business by manufacturing the best saws in the industry.

Simonds Trademark Series Inserted Tooth Saws are produced using Nickel Alloy plate that is processed in our new heat treat facility. Our new on-site heat treatment is producing plates with a consistent hardness and uniform flatness that is not available from 3rd party plate suppliers. Simonds' saws keep maintenance costs down, maximize saw run time and add profit to your bottom line.

The Trademark Series Saw features:

- Finest Quality Nickel Alloy plate manufactured in Big Rapids, MI.
- Precision Laser Cutting and CNC milling
- Computer-controlled spin tester checks for vibration and run out

We have the most experience in the business manufacturing saws. We make the best — And now they just got better!

Simonds new saw plate heat treat facility enables us to deliver the flattest and toughest saws in the business!

Edger Problems?

- Alignment issues?
- Too many banana boards?
- Not cutting as straight as you need?
- Feed roller teeth lost their bite?
- Too many profits going in the chipper?

**No need to buy a new edger. Call the edger experts.
We'll make your edger run right
and make it work for YOU... profitably!**

What our customers are saying...
"The best solution for a stubborn edger."
"If your edgerman is busy all day, something's not right."
"From experience I would say having the edger worked on was
our quickest, best return on investment we've made!
Edger work is both money and time well spent."

Our services include:

- Complete edger box rebuilds
- Custom infeed tables & outfeed beds
- Precision alignment service (mandrel, rollers, in & outfeed and more)
- In-shop tested and run prior to final installation in your mill
- Plus lots more!

**Don't let your edger be a drain on your hard earned profits.
Call us today and you'll see a big difference in your edger operation
in just one week!**

NEW Tech® PCN-55M

The better alternative for pallet recyclers
More power, less weight & better durability.

For driving nails 1-3/4" to 2" with diameters .083" to .090", we proudly introduce the new Tech PCN-55M nailer.

After many years of experience working with pallet recyclers, we've designed our new tool with features like a thicker reinforced nose and contact arm for extra durability, and air flow that is optimized to generate more power with less weight - a third to a half a pound lighter than competitive tools.

Our customers also report that the new PCN-55M holds up better in colder winter temperatures.

Although nail pricing is one component when choosing a company, an even greater consideration for us is the nail guns. Being a recycler, wood density varies from softwood to rock hardwood. The Tech 55M handled all materials with ease. It has increased production by approximately 30%. A single individual was able to increase his output from 200 to 300 pallets per day, very impressive. Overall its proven itself as a money maker for the company.

OUR UNIQUE & INNOVATIVE WOOD DRYING PROCESS DELIVERS RESULTS

BRIGHTER LUMBER MEANS HIGHER SALES

Nova Dry Kiln's innovative technology offers a unique drying method that is kinder and gentler to the wood drying process. This process results in brighter lumber and gives our customers higher sales. Nova Dry Kiln builds and designs medium and large kilns ranging from 5,500 to 120,000 or more board feet.

TIMBER DRY MANAGEMENT CONTROLS OFFER FLEXIBILITY AND EASE OF USE

When using the Timber Dry Management System kiln operators have a straight forward, simple to use, flexible program. Kiln operators can make instant changes on the touch screen interface that is provided for each individual kiln. This drying control technology uses the exclusive proven and cost-saving Nova Dry Kiln methodology.

CONTACT US FOR FURTHER DETAILS

We provide turnkey construction services along with excellent customer service as part of our dry solutions. Call our technical staff today for further information about Nova Dry Kiln and our Timber Dry Management system.

INNOVATIVE TECHNOLOGY SAVES MONEY ON UTILITIES AND DEGRADE

Our kilns not only save money on utilities but our customers experience end results of only a 1 to 1 1/2% degrade. Using the combination of a thermal blanket created from our heated floors, with fans that do not reverse rewetting the lumber surface, also moisture is not reintroduced into the drying chamber for humidity control or conditioning, to the aluminum-lined walls that offer a superbly insulated chamber, the Nova Dry Kiln saves you money on your utilities and provides you with a superior end product and in most cases only a 1 to 1 1/2% degrade.

Pallet Dip Tank Key Design Features:

- Dip tank is fabricated in 1/8" thick stainless steel, type 304, with external painted enamel mild steel structure.
- Standard pallet carriage for pallet stack up to 114" tall and maximum 2500 lbs weight. Dead packed cut stock can also be dipped.
- Tilting carriage is fabricated in stainless steel and mild steel.
- Tilting carriage has clamp system to insure pallets or lumber is submerged.
- Hydraulic system is used for all mechanical operations.
- Estimated dip cycle for pallets is 4 minutes and is user defined.
- PLC control system with remote control for initiating the dip cycle. Dip time and other parameters are adjustable in the control cabinet display.

Total Log Scale Inventory Solutions

Software • Caliper • Barcode scanner • GPS • Logtags

Now offering a complete line of tools to keep track of your inventory from start to finish

- DP II Caliper—An all-in-one rugged computer caliper that allows you to scale logs. LogScale DP software is designed to collect, process and report any load and log data and send that data to a Log Scale Suite for Haglof Management System's database.
- DP SCANNER barcode scanner module for DP II caliper, scan and store the barcode with the caliper.

- Log Scale Suite for Haglof Management Systems - Use it to create and manage contracts, price lists, tickets and loads as well as scale logs, calculate volumes and manage log inventories.
- LogTags—Durable plastic tags with many styles available to choose from to fit your needs and let you stand out. We even carry bio-degradable tags that are safe for the pulping process.

The Richmond Show

EXPO RICHMOND 2016

Richmond Raceway Complex * Richmond, Virginia
 Friday May 13th 8:30a.m. until 5:00p.m.

and

Saturday May 14th, 2016 8:30a.m. until 3:00p.m.

The 35th East Coast Sawmill and Logging Equipment Exposition

will be 2016's largest collection of sawmill, logging, biomass, pallet and related manufacturing equipment, supplies and services in the Eastern United States. More than 300 exhibiting companies and thousands of forest products industry people will convene for the 35th Richmond Show. The newest and most advanced machinery, equipment and technology in the industry will be on display. There will be acres of active hands-on machinery and equipment demonstrations outside, plus hundreds of indoor displays of new products, methods, technology and trends. Examine and compare products or services before making your purchasing decisions to improve the efficiency - and profitability - of your operation. Please fill out and return the pre-registration form below to the exposition office by April 1, 2016. Confirmations will be emailed to all pre-registered individuals by

May 4, 2016. If no email address is provided, hard copy confirmation will **NOT** be provided due to increased processing, handling, and mailing costs. There will be a **\$10.00** charge for those who register **on-site**. Pre-registrants receive HALF-OFF the on-site registration fee. All registration fees will be collected at EXPO Richmond entrance - **DO NOT SEND MONEY** with this form. Registration entitles attendees admission to BOTH EXPO 2016 exhibition days. Virginia Forest Products Association (VFPA) members who pre-register will **NOT** be assessed registration fees. For further information on becoming a VFPA member or regarding EXPO Richmond 2016, please call **(804) 737-5625**. Don't miss this opportunity to invest in your future.

EXPO RICHMOND 2016

Co-sponsored by Virginia Polytechnic Institute & State University Cooperative Extension and Virginia Forest Products Association

Return by April 1, 2016 to: **EXPO RICHMOND 2016 • P. O. Box 160 • Sandston, VA 23150-0160**

Please fill out completely and legibly. Incomplete or illegible forms can not be processed.

Only industry personnel should complete this form. Please copy this form for additional registrants. Spouses and children under 18 DO NOT complete this form. EXHIBITORS: Please contact Show Management for registration forms.

SMART PRODUCTS

Is Your Answer! For Pallet Lumber Recovery and Repair Solutions.
"The Difference is Engineering"

Leasing & Financing Alternatives Available

Dismantlers

One-Man Dismantler

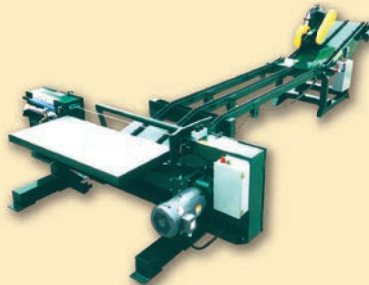

- 52" or 64" capacity
- 10 HP, 3-phase, electric motor standard (2200 FPM blade speed) (single phase available)
- Optional 15 HP, 3-phase (4400 FPM blade speed) electric motor available
- 18 HP gas-powered electric start on Portable Dismantler
- Gear reduction drive
- Self-contained hydraulic blade tensioning
- Low maintenance durable blade guide bearings
- Push button operated table height adjustment

Two-Man Dismantler

Pallet Dismantler System

- 64" capacity **Front Discharge** Dismantler
- Linear accumulating conveyor feeds boards easily to operator of Inclined Power Trim Saw
- Add additional dismantlers for higher production

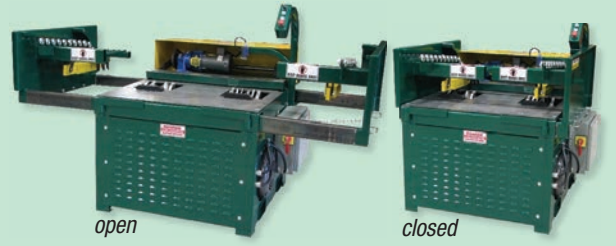

Portable Dismantler

Notchers

Double Head Notcher

- Two, 20 HP, three (3) phase, electric motors with V-belt driven indexable notching cutterheads
- One-person operation/1,000 double notched stringers per hour
- Notches new or recycled lumber
- 48" to 96" stringer capacity standard
- 9" x 1-1/2" notches, with 18" between notches
- Quick set-up
- Continuous power feed system
- Self exhaust design (useful when notching recycled material)

Single Head Notcher

- 20 HP, three (3) phase, electric motors with V-belt driven indexable notching cutterhead
- One-man operation/500 double notched stringers per hour
- Notches new or recycled lumber
- 72" stringer capacity standard
- Quick set-up
- Continuous power feed system
- Self exhaust design (useful when notching recycled material)

Pallet Prep

- Commonly referred to as the "SmartSaw"
- Smart Saw is **multifunctional**: designed for repair (1 person) or recycling (2 person) operations of BLOCK or GMA/STRINGER pallets
- Standard 10 HP, 3-phase, electric motor with gear reduction drive
- 20' standard **M42 bi-metal** band saw blade
- Air actuated, 3-position, roller table and table extension easily positions pallet for board removal
- Machine provided with **advanced safety measures** in place, including interlock switches for perimeter guarding and cabinet doors
- Improved **canopy guarding**, with front and rear portions that move up and down with the roller table

- Specifically designed to QUICKLY (as a **1-person** operation) cut out damaged boards, including **top and bottom** deck boards, as well as **connector** and **stringer** boards
- Also designed, as a **2-person** operation, to process the disassembly / tear-down of block or stringer pallets for **INCREASED LUMBER RECOVERY**. For block style machine, includes a specially designed **Block Recovery Tool** (or BRT) that **salvages blocks** now being scrapped with other machines and processes

Double End Power Feed Trim Saw

Trim Saws

- Power Feed Trim Saws trim boards 2" thick from 18" - 60" in length on the single end, and 18" - 66" in length on the double end
- Inclined board feed and overhead saw design help eliminate board kickback
- Manual Trim Saw handles boards up to 6" thick and 6" wide
- 18" diameter nail resistant saw blades and 10 HP motors
- Heavy duty steel tube construction
- Multiple adjustable board stops on Single End and on Manual Feed Trim Saws
- Easy blade change
- Easily moved with built-in fork lift pockets
- Right saw head on double end easily adjusts to cut desired board length

Single End Power Feed Trim Saw

800.401.0099

Every machine we build is backed by the pallet industry's most trusted and respected reputation. You can count on us being here long after the others are gone.

PORTABLE YARD SAW

This portable chain saw is for cutting logs or packages of lumber. It is available with electric drive or 20 HP gas engine with centrifugal clutch. It features manual or electric start.

HIGH SPEED CHOP SAW

L-M high speed chop saw is available in standard sizes from 48 to 84 inches in diameter. It features a heavy-duty construction frame and saw ladder.

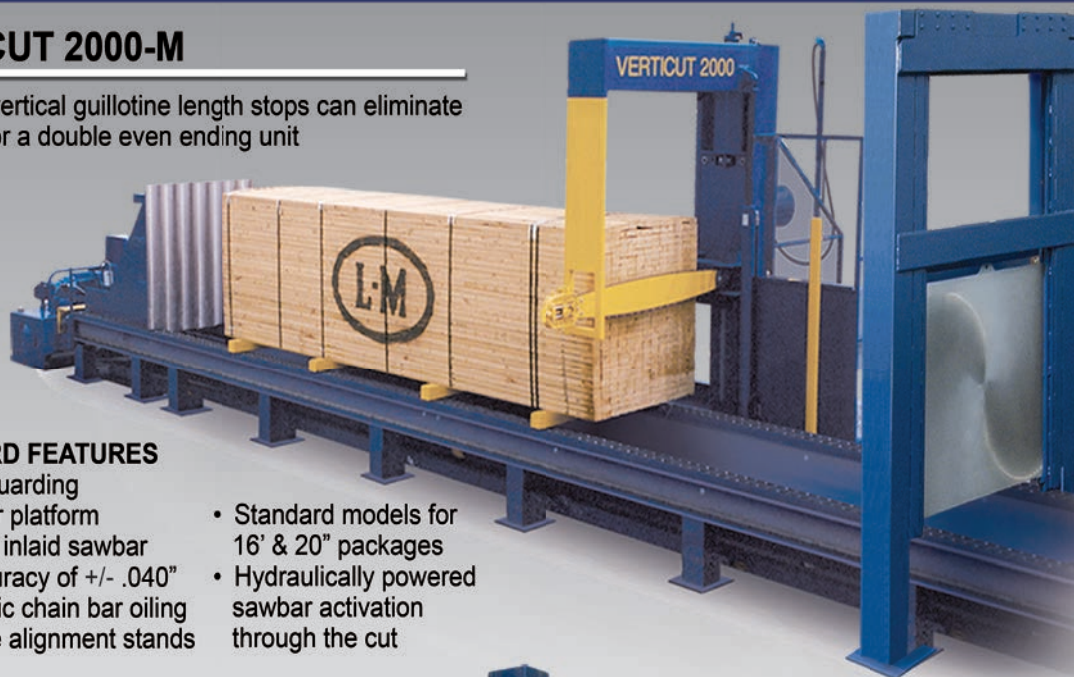

DECK SAW

Deck saw with sawbars of up to 12 feet in length are used to cut the largest of logs, and are also used to split logs length-ways.

VERTICUT 2000-M

Hydraulic vertical guillotine length stops can eliminate the need for a double even ending unit

STANDARD FEATURES

- Safety guarding
- Operator platform
- "Stellite" inlaid sawbar
- Cut accuracy of +/- .040"
- Automatic chain bar oiling
- Package alignment stands
- Standard models for 16' & 20" packages
- Hydraulically powered sawbar activation through the cut

LS SYSTEM 2000 LOG SPLITTER

- Heavy duty Hydraulically powered splitter using onboard HPU.
- Adjustable travel speed using gear reduction for high torque and low power requirements.
- Splits logs up to 60" diameter by 20ft. long
- 54" vertical adjustment capability for slabs-quartering or sizing to mill capacity.

OPTIONS AVAILABLE

- Laser light saw guide
- Modular package end squeeze
- Modular even ending system
- Automatic strapping system
- Modular infeed/outfeed decks
- Electronic length measurement with digital readout
- Powered carriage positioning

NEW HFP150 COMPACT FIREWOOD PRO From HAHN MACHINERY INC.

An affordable firewood processing attachment for those who use a lot of firewood but don't need the production capacity offered by the larger, more expensive commercial units.

Designed for use with most mid-sized and larger skid steer loaders, the new HFP150 Compact weighs 1700 lbs and requires a 15 gpm hydraulic flow.

Like its big brother, the HFP160 Firewood Pro commercial processor, the new HFP150 Compact can pick up a log up to 15" in diameter off the ground or deck, cut it into firewood lengths ranging from 12" to 20", and split those blocks into 2, 4, or 6 pieces with all functions being performed by one person from the comfort and safety of the loader's cab.

Please call **800-483-8825**
or email info@hahnmachinery.com for a free DVD, complete specifications, and pricing.

HAHN MACHINERY INC • PO BOX 220
TWO HARBORS, MN 55616

www.HahnMachinery.com

With the HFP150 Compact, the logs roll down the processor's forks into the machine's unique "shuttle trough" which carries the log up to the splitting wedge in 24" increments. Once the log is advanced to the cutting position, the trough retracts and a high speed hydraulic chainsaw cuts the firewood block. The block drops into the splitting trough and, as it's being split, the "shuttle trough" is carrying the next log segment in for cutting. The cycle is repeated until the entire log has been reduced to cut and split firewood.

DOORS OPENING AT PRS GROUP'S NEW SHOWROOM

JACKSONVILLE, ILLINOIS

— PRS Group Inc., based in Illinois will open the doors to their new showroom in their Jacksonville facility on February 15th, 2016. This showroom will host many different types of PRS machinery for demonstration as well as the CAPE Mach 2 nailing machine. Customers are encouraged to pre-schedule an appointment with PRS to visit the showroom to see these machines in action, and to meet face to face with PRS representatives to discuss production solutions for their needs.

PRS Group Inc., founded in 1989 specializes in manufacturing and engineering excellence. They manufacture a wide range of machines for the pallet sortation, repair, and recycling processes. For more information, visit www.prsgroupinc.com. PRS Group also represents Mecanica Cape, a Spain based company that focuses on creating innovative and reliable pallet machinery. PRS partnered with CAPE earlier this year representing their product lines throughout the US and Canada. To learn more about CAPE, visit their website at www.cape.es.

To contact PRS about scheduling an appointment

call the office at (217) 291-0009
 or toll free at (866) 546-8864
 or send an email to Jeff Williams

Baker Products and KASCO WoodMaxx Blades Join Forces to Win Shoot-Out

A cold and rainy October day did not dampen Baker Products' spirits (or performance) in this year's Sawmill Shoot-Out at the Paul Bunyan show in Cambridge, Ohio. The team of sawyer Hank Somer and tailman Clay Hedrick operated a Baker Blue Streak 3665D mill and a KASCO Maxx-7 blade to out-shoot the completion at this year's event. Baker Products and KASCO blades earned first place honors in the hydraulic mill category by sawing their way to an impressive production rate of 1,273 BF/hr and a production overrun of 1.07.

For the competition Hank Somer brought his new Baker Blue Streak Model 3665D from New Hampshire where he runs a one-man sawmill business. The Baker Blue Streak Model 3665D is a 65 HP Cummins diesel powered band mill that offers a cutting capacity of 36 in. x 20 ft. (D x L). His blade of choice was KASCO's Maxx-7 blade. KASCO's high-performance Maxx-7 blade features an aggressive 7-degree hook angle and 7/8" tooth spacing. Hank runs this blade on a daily basis and claims he hasn't found any other that outperforms the Maxx-7 blade from KASCO.

Ask your distributor for KASCO WoodMaxx blades and their new Maxx-7 profile or visit www.woodmaxxblades.com. Contact Baker Products at **1-800-548-6914** or visit www.bakerproducts.net for more information on their complete line of equipment.
