Are you a MEDICARE patient with a CPAP?

Do you feel like this poor guy looks? If you can't wear your CPAP because of its bulkiness or discomfort, it's definitely not helping your sleep apnea. Dr Timothy Smith offers a comfortable and convenient alternative: a custom designed oral appliance to move the jaw forward and open the airway. Many of our patients report feeling better and more rested than they have in years. Call us at **(256) 287-1250** about a sleep apnea consultation today.

200 ALABAMA BICENTENNIAL April Walking Tours

Every Saturday beginning at 10:00 am on April 1, 8, 15, 22 & 29, 2017

Join us this spring, and let us guide you through our beautiful historic town.

Community historians will guide you, as they share stories of their hometown. Each tour begins at the Cullman County Museum and a printed program will be available to each guest to keep.

Kidney cancer accounts for 129,000 deaths worldwide each year, and patients with locally advanced kidney cancer face a 50 per cent risk of it returning within five years once they have had the operation to remove a kidney. While adjuvant treatments are routinely used on patients with other types of cancer (such as breast and bowel cancer), until now there has been no such treatment capable of improving outcomes for kidney cancer patients. This is despite numerous studies being carried out in this field over the past 20 years. Recent groundbreaking research demonstrates that by taking the oral tablet Sunitinib for one year, patients are able to reduce the likelihood of their cancer returning. Sunitinib is a tried and tested drug which has been used on patients with metastatic (widespread) renal cancer for around eight years.

The U.S. Food and Drug Administration has approved Lartruvo (olaratumab) with doxorubicin to treat adults with certain types of soft tissue sarcomas (STS), which are cancers that develop in muscles, fat, tendons or other soft tissues. Lartruvo is approved for use with the FDA-approved chemotherapy drug doxorubicin for the treatment of patients with STS who cannot be cured with radiation or surgery and who have a type of STS for which an anthracycline (chemotherapy) is an appropriate treatment. The National Cancer Institute estimates that 12,310 new cases of STS and nearly 5,000 deaths are likely to occur from the disease in 2016. The most common treatment for STS that cannot be removed by surgery is treatment with doxorubicin alone or with other drugs. STS includes a wide variety of tumors arising in the muscle, fat, blood vessels, nerves, tendons or the lining of the joints.

Counterfeit church Christians cannot raise the dead or heal the sick, much the same as those who claim to be Jews but are the synagogue of Satan (Rev 2:9), which prevents children from hearing The Holy Father's Word (Acts 3:23, Jn 14:24). The false Jews taught oral interpretations, false Christians teach speculations and theories, much the same. Yet false Jews do not claim to believe in Christ as false Christians. Many churches teach it as their God's word Christians (Acts 11:26) are not under law as Israel. The Holy Bible is written proof The Holy Father's house is not divided by the lawless, heaven and earth has not passed (Mt 5:17-19, Lk 16:17). It is one law for Israel and the stranger (Ex 12:49, Lev 24:22), sin is transgression of the law, who committeth sin is of the devil (1Jn 3:4-9, Jas 2:10-11) which these churches are mute! Which leaves little doubt who is preaching from their pulpit (2Cor 11:13-15). So Be It!
