Cholesterol-lowering drugs help prevent heart attacks and strokes in adults with cardiovascular risk factors such as high cholesterol, high blood pressure, diabetes and smoking, but have not yet had a heart attack or stroke, according to a large-scale analysis of clinical trial data published in JAMA. Drugs that lower fat levels in the blood, called statins, were effective in reducing risk of death, heart attacks and strokes, across a broad range of patient groups. The benefits were largest in people at highest risk for heart attacks and strokes. The benefits were largest in people at highest risk for heart attacks and strokes. But, those at lower risk also realized some preventive benefits. In addition, the drugs did not prove to have significant harmful effects. Compared with a placebo, statins were not associated with increased risk of muscle pain or myopathy, cognitive decline or liver damage. Overall, these was no increased risk of diabetes with statins, though one trial that used a high dose of statins found an increased rick. One trial found an increased risk of cataract surgery.

A 10-year trial involving osteoarthritis and rheumatoid arthritis patients in 13 countries reveals new insights on the cardiovascular safety of widely used nonsteroidal anti-inflammatory drugs and COX-2 specific inhibitors, The study, published in the New England Journal of Medicine, finds that Celebrex poses no greater risk of heart attack, stroke, other cardiovascular problems or death than naproxen or ibuprofen. More surprisingly there is evidence that Celebrex is less likely than the other two to cause kidney and gastrointestinal problems associated with NSAIDS. Osteoarthritis, or OA, is the most common joint disease affecting middle-age and older people, It is characterized by progressive damage to the joint cartilage-the cushioning material at the end of long bones-and causes changes in the structures around the joint. Rheumatoid arthritis (RA) is a chronic disease that causes pain, stiffness, swelling, and limitation in the motion and function of multiple joints. Through joints are the principal body parts affected by RA, inflammation can develop in other organs as well.

Most so called church Christian's faith is based on the same propaganda that beguiled Eve, disguised as a lawless Christian covenant. Instead of teaching what The Holy Bible gives, he that committeth sin is of the devil (1Jn 3:8-9) or even what Christ Biblically said, the devil's work is exalted by their teachings that you cannot go without sinning and all sins, even willful ones, will be forgiven by prayer (Jn 5:14, 8:11, Rom 3:25, Heb 10:26-31). The hands of the wicked are strengthened (Ezek 13:22)! The unlearned and unstable are caused to wrest with scripture to their own destruction (2Pet 3:16). It would be hilarious how many are fleeced, if it did not cost their souls! So Be It!

SHOP TODAY'S LOW PRICE TAGS:

We have HUNDREDS of non-advertised items marked down throughout our entire store. More savings passed on to our customers. Just look for blue tags on the shelves.

NO LIMITS:

Our competitors also have advertised specials. The difference is, in most cases, they have a limit on how many of an item you can buy at the sale price...we don't have any limits to family shoppers.

IS WHAT WE ARE ALL ABOUT

We Are Proud To Be Part of The North Alabama Owned

Local North Alabama, Folks Serving North Alabama Folks! We Truly Appreciate Your Business

SHOP TODAY'S LOW PRICE TAGS:
We have HUNDREDS of non-advertised items marked down throughout our entire store. More savings passed on to our customers. Just look for blue tags on the shelves.

NO LIMITS:
Our competitors also have advertised specials. The difference is, in most cases, they have a limit on how many of an item you can buy at the sale price...we don't have any limits to family shoppers.
