If it's true that Christ knows you cannot do as He saith, and pray to Him and be forgiven, why was He manifested to destroy the devil's works (1Jn 3:8)? Why was Peter called Satan (Mt 16:22-23)? Why should Scripture (Mt 4:4, 5:17-19, 7:21-27, 15:9, 28:20, Jn 5:14, 8:11, Acts 3:23, Rom 3:25, 31, Heb 4:8, 6:6, 10:26-31, 13:8) be not accepted? Why would The Holy Bible give all shall give account (Ezek 34:17, Mt 12:36-37, 25:32, Rom 14:11-12, 2Cor 5:10, Jn 5:22) if a so called preacher can preach anyone into heaven? What could cause more sin (1Pet 5:8) in the world than what is being taught in many churches today? So Be It!

*Remember me when flowers bloom  
Early in the spring  
Remember me on sunny days  
In the fun that summer brings*

*Remember me in the fall  
As you walk through the leaves of gold  
And in the wintertime - remember me  
In the stores that are told*

Each day - right from the start  
I will be forever near

In a study published online by JAMA, researchers have determined that human papillomavirus (HPV) type-specific antibody responses would be non-inferior (not worse than) among girls and boys ages 9 to 14 years after receiving 2 doses of the 9-valent HPV vaccine compared with adolescent girls and young women ages 16 to 26 years who received the standard 3 doses.

An already available drug can help patients get back on their feet more rapidly after a hip fracture, according to an international study published in the Journal of Bone Joint Surgery. The results suggest that treatment with the drug accelerates the healing process in broken bones. The drug tested by the researchers, teriparatide, is based on a naturally occurring hormone, parathyroid hormone (PTH). Teriparatide is the active ingredient in human PTH and is currently used to treat osteoporosis (brittle bones). The hormone influences bone structure.

Two commonly prescribed statins appear to be associated with a higher risk of bleeding than others when combined with dabigatran, a drug often used for preventing strokes in patients with atrial fibrillation, according to a study published in the Canadian Medical Association Journal. Hemorrhage, or bleeding in a critical area or organ, is a possible side effect of dabigatran (brand name Pradaxa) and occasionally can be severe enough to warrant hospital admission or emergency department visits. Cholesterol-lowering statins such as lovastatin and simvastatin may increase the amount of dabigatran absorbed by the body and thereby increase the risk of bleeding, something other statins would not be expected to do.

In Loving Memory of  
**Johnny Lee Mead, Jr.**  
August 26, 1952 ~ May 22, 2017

Words cannot express how blessed we are to have such loving and caring family, friends, neighbors, co-workers and communities during the sickness and passing of our dear husband and wonderful daddy, Johnny Mead, Jr.

Your out pouring of prayers, phone calls, visits, messages and gifts were very touching and greatly appreciated.

We would like to extend our gratitude to Pastor Dwayne Harbison and Bro. Stanley Kilgore for your words of hope and promise during the memorial service.

To Barry and Brenda Yarbrough and Halie Yarbrough-Jones we thank you for your beautiful song of joy and happiness, "Oh what a day that will be!"

We appreciate the caring attention given to our family during this sorrowful time from Wesley Alldredge, Ann Williams and the staff at Cullman Heritage.

With much love, we thank you Cullman Electric Cooperative linemen and employees for honoring your brother, mentor and friend with such an incredible display of respect and love.

With Much Love For You All,  
Carol, Jennifer and Jordan Mead
