TO MAKE EVERY DOLLAR COUNT- YOU HAVE TO MAKE

We're proud of the fact that HOLTEC pioneered the concept of precise package cutting over 40 years ago. Today our industry's technological and manufacturing advances have enabled us to achieve the fastest cut in the industry and an unmatched precision on every cut. So, if you're considering investing in a package-crosscut saw, consider these facts:

- At 55 seconds per cut HOLTEC systems cut up to twice as fast as other systems available today;
- With our own team of dedicated Field Technicians and service vehicles, HOLTEC is the only company that provides you a service response time of 24 hours or less on-site and on-time;
- Our state of the art Germany manufacturing facilities are ISO-9001 certified, ensuring that you're getting the highest quality manufacturing standards available today;
- With an unmatched precision of +/- 1mm (.040"), HOLTEC systems exceed precision-end-trim tolerances;
- HOLTEC systems are designed with the highest safety standards in the world, ensuring that your employees are working in the safest environment for package-crosscutting available today;
- HOLTEC has almost 2,000 systems in North America and over 8,000 systems delivered worldwide, ensuring that we'll be here for you in the future as we have been for the last 40 years
- For custom manufacturers, our Transcut® II Station will cleanly cut through a unit of hardwood or softwood in less than a minute using generic chain-saw chain and with a precision of +/- 1/16th" or better*.
- For simple crosscutting of EWP or lumber, our versatile Transcut® Portable saws are priced and designed to offer a significantly safer and faster alternative to hand-held chain saws.

WE ENSURE EVERY DOLLAR COUNTS BY ENSURING EVERY CUT COUNTS

"We just run 'em"

in '94, it was about 18 years old and we just ran it. Then I bought the first new Cleereman in '98. Running Cleereman carriages has been one of the greatest decisions that I've made in my entire career because they just run... Cleereman is a great product, with great service, with nearly zero downtime and parts that are reasonably priced and available within 24 hours. And you can't ask for better people to deal with, that's Why I Never Looked Back."

Ed Robbins Ohio Valley Veneer

Currently running six Cleereman Carriages with a LumberPro on order.

WHEN YOU NEED VERSATILITY...

Come to the Scragg Experts!

SPECIALIZING IN SCRAGG MILLS FOR OVER 50 YEARS

In 2015 Beasley Forest Products upgraded to a Cooper Machine Skewing Overhead Scragg Mill.

"We replaced another Cooper Scragg that had been running about 16 years." The original machine continued to perform well, but the company wanted to improve its production. "Cooper, like us, has grown over the years and has developed some very good equipment." - Phil Clements, Mill Manager, Beasley Forest Products

The better alternative for pallet recyclers More power, less weight & better durability.

For driving nails 1-3/4" to 2" with diameters .083" to .090", we proudly introduce the new Tech PCN-55M nailer.

After many years of experience working with pallet recyclers, we've designed our new tool with features like a thicker reinforced nose and contact arm for extra durability, and air flow that is optimized to generate more power with less weight - a third to a half a pound lighter than competitive tools.

Our customers also report that the new PCN-55M holds up better in colder winter temperatures.

Although nail pricing is one component when choosing a company, an even greater consideration for us is the nail guns. Being a recycler, wood density varies from softwood to rock hardwood. The Tech 55M handled all materials with ease. It has increased production by approximately 30%. A single individual was able to increase his output from 200 to 300 pallets per day, very impressive. Overall its proven itself as a money maker for the company.

Simonds Saws Are The Best!

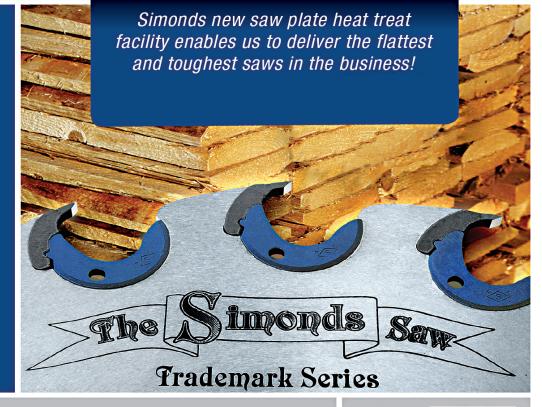

For over 180 years Simonds has thrived in the saw business by manufacturing the best saws in the industry.

Simonds Trademark Series Inserted Tooth Saws are produced using Nickel Alloy plate that is processed in our new heat treat facility. Our new on-site heat treatment is producing plates with a consistent hardness and uniform flatness that is not available from 3rd party plate suppliers. Simonds' saws keep maintenance costs down, maximize saw run time and add profit to your bottom line.

The Trademark Series Saw features:

- Finest Quality Nickel Alloy plate manufactured in Big Rapids, Ml.
- Precision Laser Cutting and CNC milling
- Computer-controlled spin tester checks for vibration and run out

We have the most experience in the business manufacturing saws. We make the best — And now they just got better!

DISMANTLE MORE PALLETS PER BLADE. PERIOD.

NEW! PALLET HAWG® PALLET DISMANTLING BANDSAW

60" width capacity

Designed for a full range of pallet recycling including pallet prep, repair, dismantle, and recovery, the Pallet Hawg® Pallet Dismantler from Wood-Mizer has earned a worldwide reputation for being **extremely durable and reliable through simple and innovative engineering**. Due to the unique combination of high torque and low RPMs with a bi-metal blade, the Pallet Hawg® has an expected blade life of **1,200 to 1,500 dismantled pallets per blade** which is nearly double the blade life of competitive pallet dismantling saws. With **one or two operators**, easily remove stringer boards, blocks, and deck boards of a pallet with the Pallet Hawg® from Wood-Mizer.

Adjustable table height with 5 1/4" travel

____ FEATURES

No fail mechanical

blade tension system

10 hp motor with gear reduction drive

Pneumatic hand valve moves table up and down

RWA #26 **Carl Theorin** RWA #135

ClearSpan Fabric Structures offers the Hybrid Building, which provides a design-build solution for material and equipment storage needs. These structures offer the option of steel or fabric sidewalls with the proven durability of ClearSpan's Hercules Truss Arch frames. The fabric roofing is available in several colors, and its permeable properties make it extremely energy efficient. The fabric allows natural light to pass through, eliminating the need for artificial daytime lighting.

Since there are no internal support posts, the building allows for maximum usable space. The buildings are available up to 160'W and feature an industryleading 20 year warranty on the cover and a 50 year warranty on the frame.

For more information, please visit www.clearspan.com or call 1.866.643.1010.

Why Pay Sky High **Commission Rates** to Sell Your Business or Equipment?

HOT ON THE MARKET!

Set Shaft Carriage Setworks

Thomas Industrial Controls has released the latest edition to its Sawmill Setworks Systems lineup. The G402 setworks is designed specifically for Set Shaft carriages. Whether you're cutting grade, cross ties, pallet stock or other blocking, this system is for you. This new edition was built with the same reliable and familiar platform as our most popular G401 system, which has been in operation worldwide for over 15 years. Simple to learn and use, it also offers the latest onboard diagnostics and data logging for troubleshooting and production recording. Some of the added benefits to the new G402 system include a larger 9.7" touch screen HMI that uses the same display and processor found in iPads. It is much faster and features a crystal clear image with a wide viewing angle.

Blade Deviation Monitoring is now included, which has proven valuable for circle and band applications.

Pallet Dismantler Wood-Mizer Wood-Mizer

Wood-Mizer, a global manufacturer of wood processing equipment, introduces a pallet dismantling bandsaw to its diverse and growing product line. Wood-Mizer now owns and manufactures the popular Pallet Hawg® pallet dismantler that has earned a worldwide reputation for being extremely durable and reliable through a simple and innovative design. Pallet Hawg® expert Brad Kirkaldy has joined Wood-Mizer and brings decades of experience to the company's pallet recycling division.

The Pallet Hawg® PD200 Pallet Dismantler is designed for a full range of pallet recycling including pallet prep, repair, dismantle and recovery. Due to the unique combination of high torque and low RPMs, the PD200 has an expected blade life of 1,000 to 1,500 dismantled pallets per blade which is nearly double the blade life of competitive pallet dismantling saws! Designed for one or two operators, the PD200 features a sturdy welded steel tube frame that firmly supports two pneumatic wheels. The bi-metal blade that cuts the nails to dismantle the pallet is powered by a 10 HP electric motor with a gear reduction drive. A pneumatic table lift has preset heights to enable quick and convenient shifting between upper and lower cut points to easily remove stringer boards, blocks, and deck boards of a pallet. Available in 60", 66", 72", 84" and 96" material width capacity options.

For more information, contact Wood-Mizer Pallet Recycling Product Manager Brad Kirkaldy at **765.228.6775**, e-mail **bkirkaldy@woodmizer.com** or visit online at **www.woodmizer.com/pallethawg**.

Heavy Duty Gang Saw

The **Pendu** Heavy Duty Gang Saw is our heaviest gang saw. Built for both durability and efficiency, the Heavy Duty Gang Saw rips through cants and boards with ease! It has a cutting capacity of 6 inches high and 12 inches wide. A 125 HP top arbor motor and 150 HP bottom arbor motor help to achieve feed rates of up to 200 FPM. Pendu's innovative feed system features 27 powered rolls (10 top, 17 bottom). Pendu has used a unique hardening and chroming process to develop the strongest and most durable rolls in the industry. The Heavy Duty Gang Saw is constructed with a 1 1/4 inch thick steel box frame.
