Dear Friends & Loyal Customers,

It is with difficulty that we write this, after 11+ years AJ's Steakhouse will be closing our doors, August 1, 2017. That is a hard thing to write and saying goodbye is not easy for us. It is tough to find the words to express the true feeling of friendship that we have for each of our customers. Your loyalty & business over the past 11+ years has been such a blessing. We want to thank our customers from the bottom of our hearts for everything. This restaurant was a dream for Doug and Melody Hill and it all could not have been possible without you guys. As most of you know, Doug passed away a little over a year ago. Melody has put all she has into keeping the business going but the time has come where she must put her focus on other things with their daughter AJ and continue to heal. We thank you all for your patience, love and support over this past year. We will miss each of you but we have been blessed, so very blessed to share our business over the past 11 years with you all.

Thank you again for everything and God Bless each of you.

Melody, AJ, and the AJ's Steakhouse crew

Melody F. Hill

A new study published in PLOS ONE has found that people who take proton pump inhibitors (PPIs) had a 70 per cent increase in the risk of being admitted to hospital with infectious gastroenteritis.

A new Universite' de Montreal study in the British Medical Journal reveals that antidepressants prescribed to pregnant women could increase the chance of having a baby with birth defects. The risk-6 to 10 %, versus 3 to 5 % in women who do not take the drugs-is high enough to merit caution in their use, especially since, in most cases, they are only marginally effective, the study says. For example, when Celexa (the brand name for citalopram) was taken in the first trimester, the risk of major birth defects jumped from 5 per cent to 8 per cent. Similarly, use of Paxil (paroxetine) was associated with an increased risk of heart defects; venlafaxine (Effexor), with lung defects; and tricyclic antidepressants (such as Elavil), with increased eye, ear, face and neck defects.

As many as three out of four surgery patients could be receiving anti-clotting medications that they do not need, according to new research. A study published in Annals of Surgery challenges standard-of-care guidelines specifying that all general surgery patients receive anticoagulants. The treatment is meant to prevent formation of blood clots in the veins. In the worst cases, clots could break free and block blood flow to vital organs such as the lungs, causing sudden death. However the new findings suggests that the preventive measure may be unnecessary for most patients, and could even be harmful to a small proportion.

Looking For A Special Pre-K?

We have an excellent pre-K at KidZone Learning Center, LLC. Our pre-K exceeds the Head Start program.

- Reading - recognition of vowels, consonant, letter and sound blends, sight words and color words
- Math - count to 100, recognize numbers 1-20, addition/subtraction, patterns, shapes & opposites
 - Spelling - first and last name, and spelling challenges to help with thinking skills
- Science - planets, order and facts about each, animal habitats, plant growth and cycles, weather, seasons, colors blends, cause and effect
 - Social Studies - facts about our home living, Alabama and surrounding states, Presidents, community helpers and holiday significance. We start each day with the Pledge of Allegiance.

Our lessons cover much more than is required to make sure each child is ready for kindergarten

Why is our pre-K class so great?
Our one year old room teaches the basics such as; small and large muscle activities, letters, sound games, shapes, songs and colors as we transition from our ones to our two year old room we recognize letter sounds, counting small numbers, colors, animals and their sounds, finger plays, educational songs, as well as friendly group play and sharing. In the three year old class they will begin getting ready for our pre-K class learning letters and sounds, counting to twenty, learning to trace and write their name, recognizing colors, days of the week, months of the year, each child's learning skills are evaluated and though each child is allowed to learn at his/her own pace we work to prepare each child so that they know the proper skills when entering our pre-K program.

KidZone Learning Center accepts children ages 3 weeks to 12 years. Accepting enrollment in all age groups. We look forward to have you visit our center.
