Billy Earl Turner

August 24, 1934 ~
June 26, 2017

Dad was a beloved husband, father, papaw and friend to many, He took pride in his family and loved spending time with them.

He always had a smile on his face that would light up a room with laughter even in his darkest days. Dad was a generous man that loved giving to and helping others. He enjoyed drinking coffee at Jack's with his friends, sitting outside in the swing waiting for someone to stop to talk, and his daily ride in the pasture to check on his cows.

We truly appreciate the prayers, support and love from our family and friends during this difficult time. Thanks so much for the beautiful flowers, the delicious food and the visits that brighten dad's days.

Thank you, Brother Shepherd and Pastor Dodd, for your comforting words that helped us move past our grief and toward an appreciation of who dad was and where he is now. Thanks Craig Edwards, Sharon Elliott, Karen McReath and Nic Brown for the beautiful music, dad would have loved it.

A special thanks to Dr. Stephen Beck and the staff at St. Vincent's Bruno Clinic for the excellent care dad received.

Dad's love for life and family will live on in the many great memories he has left behind for this children and grandchildren.

PHARMACY TOPICS

Hospital Discount CENTRAL

Pictured L-R: Vanessa Patton, Becky Cook, Becky Burks and Rex Smith, RPh

Taking one-fourth the standard dose of a widely used drug for prostate cancer with a low-fat breakfast can be as effective-and one-fourth as expensive-as taking the standard dose as recommended on an empty stomach. The finding has significant financial implications. The drug, abiraterone acetate-marketed as ZYTIGA-now retails for more than \$9,000 per month. Even patients with blue-ribbon health insurance can have co-pays ranging from \$1,000 to &3,000 per month. Patients taking abiraterone acetate typically stay on the medication for 12 to 18 months. The American Cancer Society estimates that 161,360 men will be diagnosed with prostate cancer in 2017 and 26,730 men will die from the disease.

Nine years ago, SWOG (a cancer research organization) researchers confirmed a new standard of care for patients with incurable gastrointestinal stromal tumors (GIST), who could survive by being treated with imatinib mesylate, the breakthrough drug marketed as Gleevec.

Now long-term findings from that study estimate that nearly one in four patients treated with Gleevec will survive 10 years. Results are published in JAMA Oncology. GISTs are different from more common types of gastrointestinal tumors because of the type of tissue in which they start. GISTs belong to a group of cancers called soft-tissue sarcomas. Soft-tissue sarcomas develop in the tissues that support and connect the body, including muscles, nerves, tendons, and joints. GIST is a rare cancer, with about 6,000 new cases diagnosed in the United States each year. Presented as a service to the community by

SHOP TODAY'S LOW PRICE TAGS:
We have HUNDREDS of non-advertised items marked down throughout our entire store. More savings passed on to our customers. Just look for blue tags on the shelves.

NO LIMITS:
Our competitors also have advertised specials. The difference is, in most cases, they have a limit on how many of an item you can buy at the sale price...we don't have any limits to family shoppers.
