## UNSCRAMBLER INFEEED DECK

The Baker Unscrambler V-Deck breaks down your bundles of lumber to provide single feeding from the Dealer Deck. This machine helps lower your labor cost by increasing production and throughput at the AmbiTrim cut off saw.

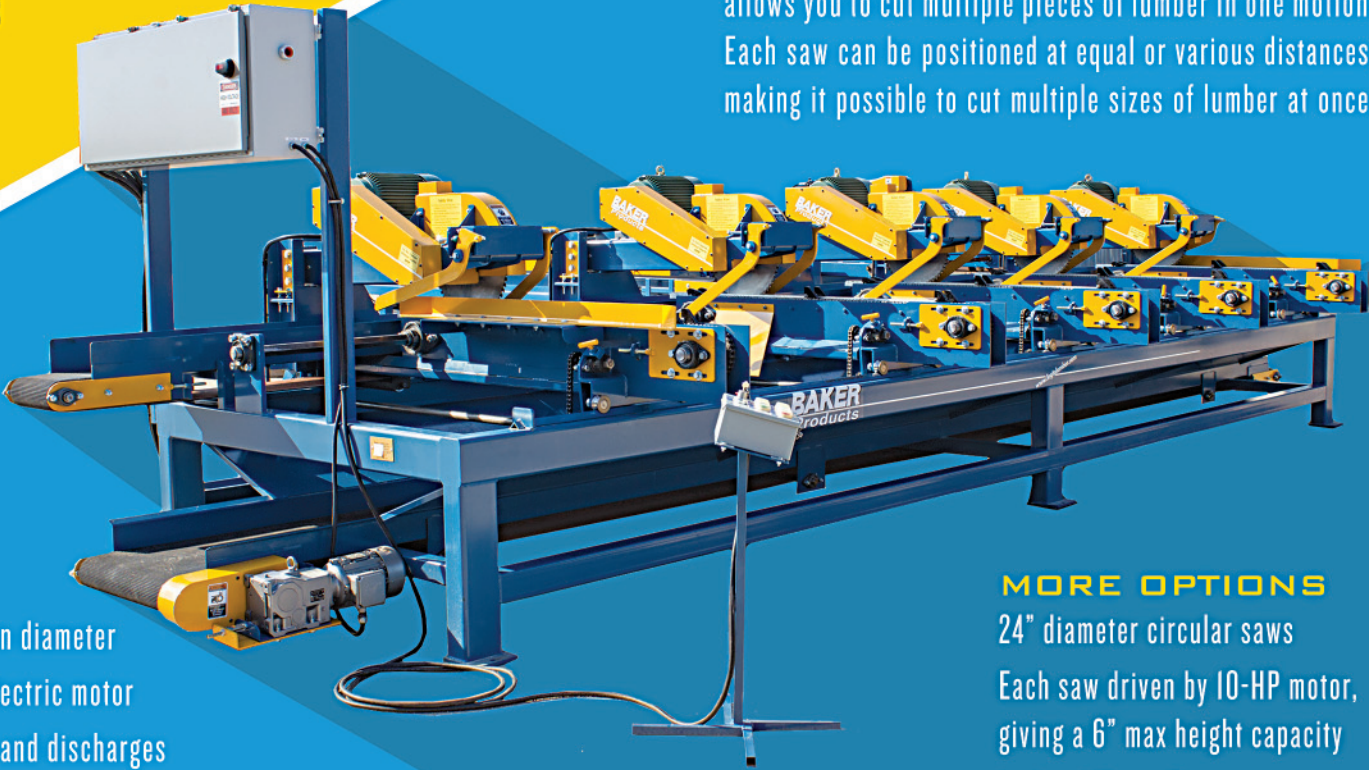

CALL US FOR A QUOTE!

## AMBITRIM CUT OFF SAW

The Baker AmbiTrim is a multiple head cut-off saw that allows you to cut multiple pieces of lumber in one motion. Each saw can be positioned at equal or various distances, making it possible to cut multiple sizes of lumber at once.

### FEATURES

From 2–8 circular saws, each 18" in diameter  
Each saw is powered by a 7.5-HP electric motor  
24"-Wide trough conveyor collects and discharges waste & end block material  
MATERIAL CAPACITIES: Width: 3/4 in. min–12 in. max  
Length: 24 in. min–20 ft. max Height: 1/4 in. min–3-1/2 in. max

### MORE OPTIONS

24" diameter circular saws  
Each saw driven by 10-HP motor, giving a 6" max height capacity  
Inclined Waste Conveyors  
Round Turntable  
Self-Dumping Steel Hoppers

# TO MAKE EVERY DOLLAR COUNT- YOU HAVE TO MAKE EVERY CUT COUNT

**Selecute® V** with **Inline Squeeze**

- For prime lumber cut to length or Precision End Trimming needs, our Selecute®-V uses a Fixed Frame Assembly with a moveable cutting platform to meet your production needs in a limited space environment and is available with our Inline Power-Squeeze Package Alignment system.
- For high-volume automated crosscutting of industrial length stock, our Autocut®-V uses a computerized carriage assembly with PLC controls enabling you to process lumber without an operator present.

**Transcut® II Station**  
from \$26,999\*

**Transcut® II Portable**  
from \$7,999\*

**Autocut® V**

We're proud of the fact that HOLTEC pioneered the concept of precise package cutting over 40 years ago. Today our industry's technological and manufacturing advances have enabled us to achieve the fastest cut in the industry and an unmatched precision on every cut. So, if you're considering investing in a package-crosscut saw, consider these facts\*:

- At 55 seconds per cut HOLTEC systems cut up to twice as fast as other systems available today;
- With our own team of dedicated Field Technicians and service vehicles, HOLTEC is the only company that provides you a service response time of 24 hours or less on-site and on-time;
- Our state of the art Germany manufacturing facilities are ISO-9001 certified, ensuring that you're getting the highest quality manufacturing standards available today;
- With an unmatched precision of +/- 1mm (.040"), HOLTEC systems exceed precision-end-trim tolerances;
- HOLTEC systems are designed with the highest safety standards in the world, ensuring that your employees are working in the safest environment for package-crosscutting available today;
- HOLTEC has almost 2,000 systems in North America and over 8,000 systems delivered worldwide, ensuring that we'll be here for you in the future as we have been for the last 40 years

- For custom manufacturers, our Transcut® II Station will cleanly cut through a unit of hardwood or softwood in less than a minute using generic chain-saw chain and with a precision of +/- 1/16th" or better\*.
- For simple crosscutting of EWP or lumber, our versatile Transcut® Portable saws are priced and designed to offer a significantly safer and faster alternative to hand-held chain saws.

**WE ENSURE EVERY DOLLAR COUNTS BY ENSURING EVERY CUT COUNTS**

# “We just run ‘em”

See us at  
**Paul Bunyan Show**  
October 6th-8th

*“... I bought my first Cleereman at auction in '94, it was about 18 years old and we just ran it. Then I bought the first new Cleereman in '98. Running Cleereman carriages has been one of the greatest decisions that I've made in my entire career because they just run... Cleereman is a great product, with great service, with nearly zero downtime and parts that are reasonably priced and available within 24 hours. And you can't ask for better people to deal with, that's Why I Never Looked Back.”*

**Ed Robbins**  
Ohio Valley Veneer

Currently running six Cleereman Carriages with a LumberPro on order.

✓ 5-man operation 8hrs - 20,000 to 25,000+ bd/ft

✓ Fast payback

✓ Low maintenance

MADE IN Moscow, TN USA

RECENT HURDLE HEAVYWEIGHT MILLS SOLD

★★★★★

"We currently run four Hurdle mills and they give us the versatility to cut cants, ties, grade, and feed our thin-kerf resaws ... Hurdle has been a big part of our success for the last 25 years. You could spend 4 or 5 million dollars building a mill to square logs for a resaw, but why? Hurdle is the MOST cost effective headsaw, no other sawmill can produce like this and keep total capital investment this low!"  
Brandon Clark, Clark Lumber Company

"When sourcing machinery for a new mill, I was looking for quick delivery, reliability, productivity, and support. Hurdle met my expectations and their parts support is excellent."  
F.S. Beal, Beal Lumber Company, Inc

**PORTABLE YARD SAW**

This portable chain saw is for cutting logs or packages of lumber. It is available with electric drive or 20 HP gas engine with centrifugal clutch. It features manual or electric start.

**HIGH SPEED CHOP SAW**

L-M high speed chop saw is available in standard sizes from 48 to 84 inches in diameter. It features a heavy-duty construction frame and saw ladder.

**DECK SAW**

Deck saw with sawbars of up to 12 feet in length are used to cut the largest of logs, and are also used to split logs length-ways.

**VERTICUT 2000-M**

Hydraulic vertical guillotine length stops can eliminate the need for a double even ending unit

**STANDARD FEATURES**

- Safety guarding
- Operator platform
- "Stellite" inlaid sawbar
- Cut accuracy of +/- .040"
- Automatic chain bar oiling
- Package alignment stands
- Standard models for 16' & 20" packages
- Hydraulically powered sawbar activation through the cut

**LS SYSTEM 2000 LOG SPLITTER**

- Heavy duty Hydraulically powered splitter using onboard HPU.
- Adjustable travel speed using gear reduction for high torque and low power requirements.
- Splits logs up to 60" diameter by 20ft. long
- 54" vertical adjustment capability for slabs-quartering or sizing to mill capacity.

**OPTIONS AVAILABLE**

- Laser light saw guide
- Modular package end squeeze
- Modular even ending system
- Automatic strapping system
- Modular infeed/outfeed decks
- Electronic length measurement with digital readout
- Powered carriage positioning

**No-Spill, Gentle  
Loading of  
Firewood or Mulch**

**Gentle  
loading**

The operator controls how fast the drop bottom doors  
open as the hopper is raised.

**Loading  
complete**

All action is controlled from the operator's seat. Faster,  
easier and safer. No damage, no complaints.

*"We really like Iron Bull's EZ-Load Hopper for loading fire-  
wood. It does it better and gentler than a front end loader."*  
-Jac Siemens, Southeast Pallet & Wood Products, Blumenort, Manitoba, CA

*"Our customers are impressed."*  
Elam Swarey Jr., Parke County Firewood, LLC

Reduce the risk of damaging your customer's vehicle. The  
Iron Bull EZ-Load Hopper loads firewood gently and safely.  
Customers love it when you're easy on their trucks or  
trailers. With conventional hoppers or front end loaders,  
you have to be an expert operator to get it positioned  
just right. Now with the new EZ-Load Hopper, almost  
any operator can load a pickup without sending  
firewood pieces flying. Also great for loading mulch.

Call today for more information.

## SIMONDS®

### PreSharp™

### IS REAL SHARP!

PreSharp™ IS AVAILABLE IN 3 WIDTHS:  
• 1" OS wide • 1-1/4" wide • 1-1/2" wide

#### Not all Ground Tooth blades are created equal!

#### PreSharp™

SQUARE FACE BLADE DETAIL

Simonds PreSharp™ blades have a unique, square-face cutting edge.

Conventional blades, even "ground tooth" types, have a twist on the face. This twist pushes saw dust to the sides of the blade, potentially causing poor tracking and dust spillage.

## BANDSAW BLADES FOR ALL CUTTING APPLICATIONS

### MAKE SIMONDS YOUR SOURCE FOR

PORTABLE SAWMILL BLADES, FIREWOOD PROCESSING SAWS, SAW TEETH, & CHIPPER KNIVES.

SAWBLADES AND TEETH FOR FIREWOOD PROCESSING SAWS

## OUR UNIQUE & INNOVATIVE WOOD DRYING PROCESS DELIVERS RESULTS

### TIMBER DRY MANAGEMENT CONTROLS OFFER FLEXIBILITY AND EASE OF USE

When using the Timber Dry Management System kiln operators have a straight forward, simple to use, flexible program. Kiln operators can make instant changes on the touch screen interface that is provided for each individual kiln. This drying control technology uses the exclusive proven and cost-saving Nova Dry Kiln methodology.

### CONTACT US FOR FURTHER DETAILS

We provide turnkey construction services along with excellent customer service as part of our dry solutions. Call our technical staff today for further information about Nova Dry Kiln and our Timber Dry Management system.

1-502-409-4539

[www.novadrykiln.com](http://www.novadrykiln.com) • e-mail: [info@novadrykiln.com](mailto:info@novadrykiln.com)

### BRIGHTER LUMBER MEANS HIGHER SALES

Nova Dry Kiln's innovative technology offers a unique drying method that is kinder and gentler to the wood drying process. This process results in brighter lumber and gives our customers higher sales. Nova Dry Kiln builds and designs medium and large kilns ranging from 5,500 to 120,000 or more board feet.

### INNOVATIVE TECHNOLOGY SAVES MONEY ON UTILITIES AND DEGRADE

Our kilns not only save money on utilities but our customers experience end results of only a 1 to 1 1/2% degrade. Using the combination of a thermal blanket created from our heated floors, with fans that do not reverse rewetting the lumber surface, also moisture is not reintroduced into the drying chamber for humidity control or conditioning, to the aluminum-lined walls that offer a superbly insulated chamber, the Nova Dry Kiln saves you money on your utilities and provides you with a superior end product and in most cases only a 1 to 1 1/2% degrade.

## Join Tusco Hardwoods in Sugarcreek, OH as a Stringer Chipper Operator... Here's Why:

*"The standout feature of the Stringer Chipper is their rugged, heavy duty design. The beefiness of their spout and housing really turned our heads. They went above and beyond to make the 70" chipper fit into our existing space. They built the equipment to match our needs, not the other way around."*

# kiln-direct.com

The leading provider of kilns for lumber, pallets and firewood

**Pallet kiln**

280-1000 pallets

- Portable turn key units with fast treating time
- Heat treats and dries in the same chamber
- Computerized record keeping
- High efficiency direct gas heating
- Aluminum or stainless steel chamber
- End-load models 300-1000 pallet capacity
- Side-load models 280-700 pallet capacity
- Piggy-back system for insulated van body or container

**Firewood kiln**

6 cord MiniQuick

- Wood waste or gas heat
- Easily meets 160F/75mins
- Heat treat in 8-16 hours
- Kiln dries green firewood in 1-2 days
- 6 cord (MiniQuick) up to 24 cord
- Baskets for optimized airflow are available

MiniQuick firewood kiln has been specifically designed to dry and HT firewood quickly and efficiently

**Lumber kiln**

9000-21000 bf

- 100% aluminum construction
- Gas, hot water or steam heated
- Power venting with Heat Recovery
- Bi-fold door with electrical operation is optional upgrade
- Computerized control with wireless communication to office
- Loading capacity from 9000 bf to 21000 bf

Call us today and find out how our pallet, firewood and lumber kilns can increase your profit...

**Pallet Dip Tank**  
Key Design Features:

- Dip tank is fabricated in 1/8" thick stainless steel, type 304, with external painted enamel mild steel structure.
- Standard pallet carriage for pallet stack up to 114" tall and maximum 2500 lbs weight. Dead packed cut stock can also be dipped.
- Tilting carriage is fabricated in stainless steel and mild steel.
- Tilting carriage has clamp system to insure pallets or lumber is submerged.
- Hydraulic system is used for all mechanical operations.
- Estimated dip cycle for pallets is 4 minutes and is user defined.
- PLC control system with remote control for initiating the dip cycle. Dip time and other parameters are adjustable in the control cabinet display.

# SMART PRODUCTS

*Is Your Answer! For Pallet Lumber Recovery and Repair Solutions.*  
*"The Difference is Engineering"*

**Leasing & Financing Alternatives Available**

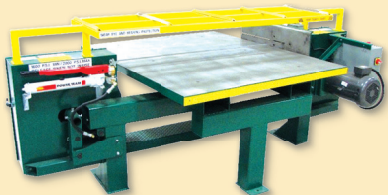

## Dismantlers

### One-Man Dismantler

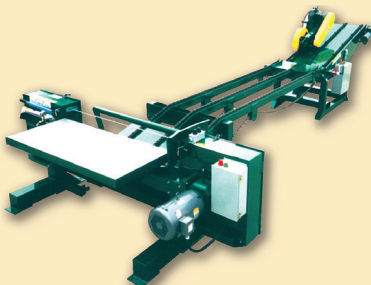

- 52" or 64" capacity
- 10 HP, 3-phase, electric motor standard (2200 FPM blade speed) (single phase available)
- Optional 15 HP, 3-phase (4400 FPM blade speed) electric motor available
- 18 HP gas-powered electric start on Portable Dismantler
- Gear reduction drive
- Self-contained hydraulic blade tensioning
- Low maintenance durable blade guide bearings
- Push button operated table height adjustment

### Two-Man Dismantler

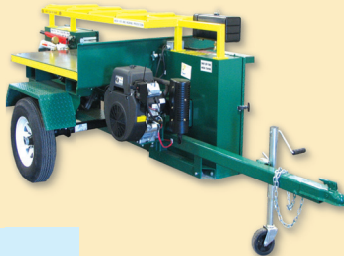

### Pallet Dismantler System

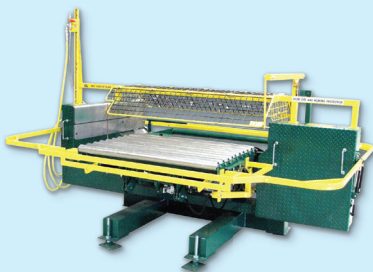

- 64" capacity **Front Discharge** Dismantler
- Linear accumulating conveyor feeds boards easily to operator of Inclined Power Trim Saw
- Add additional dismantlers for higher production

### Portable Dismantler

## Pallet Prep

- Commonly referred to as the "SmartSaw"
  - Smart Saw is **multifunctional**: designed for repair (1 person) or recycling (2 person) operations of BLOCK or GMA/STRINGER pallets
  - Standard 10 HP, 3-phase, electric motor with gear reduction drive
  - 20' standard **M42 bi-metal** band saw blade
  - Air actuated, 3-position, roller table and table extension easily positions pallet for board removal
  - Machine provided with **advanced safety measures** in place, including interlock switches for perimeter guarding and cabinet doors
  - Improved **canopy guarding**, with front and rear portions that move up and down with the roller table
- Specifically designed to QUICKLY (as a **1-person** operation) cut out damaged boards, including **top and bottom** deck boards, as well as **connector** and **stringer** boards
- Also designed, as a **2-person** operation, to process the disassembly / tear-down of block or stringer pallets for **INCREASED LUMBER RECOVERY**. For block style machine, includes a specially designed **Block Recovery Tool** (or BRT) that **salvages blocks** now being scrapped with other machines and processes

## Notchers

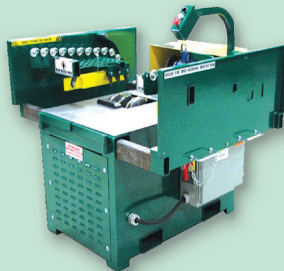

### Double Head Notcher

- Two, 20 HP, three (3) phase, electric motors with V-belt driven indexable notching cutterheads
- One-person operation/1,000 double notched stringers per hour
- Notches new or recycled lumber
- 48" to 96" stringer capacity standard
- 9" x 1-1/2" notches, with 18" between notches
- Quick set-up
- Continuous power feed system
- Self exhaust design (useful when notching recycled material)

### Single Head Notcher

- 20 HP, three (3) phase, electric motors with V-belt driven indexable notching cutterhead
- One-man operation/500 double notched stringers per hour
- Notches new or recycled lumber
- 72" stringer capacity standard
- Quick set-up
- Continuous power feed system
- Self exhaust design (useful when notching recycled material)

### Double End Power Feed Trim Saw

## Trim Saws

- Power Feed Trim Saws trim boards 2" thick from 18" - 60" in length on the single end, and 18" - 66" in length on the double end
- Inclined board feed and overhead saw design help eliminate board kickback
- Manual Trim Saw handles boards up to 6" thick and 6" wide
- 18" diameter nail resistant saw blades and 10 HP motors
- Heavy duty steel tube construction
- Multiple adjustable board stops on Single End and on Manual Feed Trim Saws
- Easy blade change
- Easily moved with built-in fork lift pockets
- Right saw head on double end easily adjusts to cut desired board length

## The Longest Lasting Debarker Head on the Market!

Why? Cutting Edge technology allows the carbide teeth to be indexed  
up to 6 times before they need replacing. That saves you money!

- 12" & 15" models
- Solidly constructed  
with All Steel bodies

The Bark-King Depth Control bearing can be used on many  
Rosserhead debarking heads to provide excellent control of the  
debarking process by preserving wood fiber.

**Again — this saves you money!**

So, get the #1 performing head  
on the market AND save money!

# Customized Round Saws For Your Mill

**Smith Sawmill Service designs & manufactures custom saws to fit your specifications. Our experience, advanced design software and complete CNC machine and saw service are backed by more than 25 years experience serving the wood industry.**

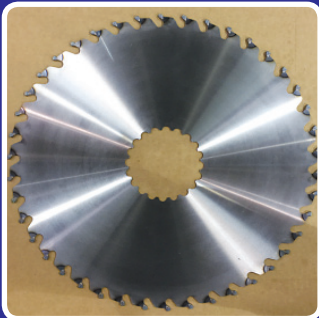

We make sure our customers have the best cutting tools to increase yield and produce the highest quality lumber products in the most efficient manner.

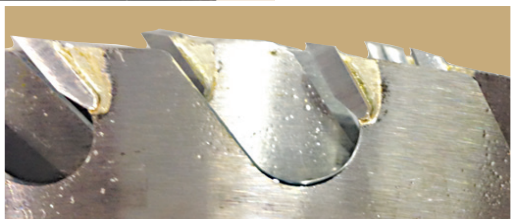

## Custom circular saw blades for sawmills & timber processing including:

- Precision Auto Tip– Precision Level
- Curve-sawing & Guided Gangs
- Tensioning that fits your machine
- Edger, Trimmer, and gang saws
- Stellite ® / Carbide / Hard tipping
- Vari-Pitch or Conventional

**Our saw teeth give you more grinds with less failure...**

- Carbide, Plasma weld & resistant weld tips
- Plates only or saws "Ready to Run"

**Over 20,000 feet of floor space and 30+ employees to make sure you get the right saw for the right job!**

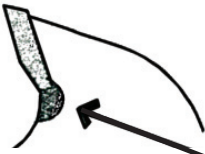

**Our Guided Edger Saws are put through 3 stages of leveling & tensioning to assure the best quality possible.**

## Need Faster Feeds and Longer Run Times? Our Radial Xtreme Saws Are Your Answer!

This design allows **XTREME RADIAL** angles. The relief area placed in the correct location allows side grinding wheels to pass the tooth without touching, damaging or compromising the plate. This will allow a finish ground even or below the original plate thickness at the bottom of tooth. Allowing **XTREME RADIAL** angles of .010 or more drop from top to bottom. This **XTREME RADIAL** angle will allow sharper corners, resulting in less drag, less heat, straighter cuts, faster speeds and longer run time.

Ask for it by name: Radial Xtreme Saws by Smith Sawmill Service

**Try our tool risk free for 30 days!**  
**NEW Tech® PCN-55M**

**TECH**

Although nail pricing is one component when choosing a company, an even greater consideration for us is the nail guns. Being a recycler, wood density varies from softwood to rock hardwood. The Tech 55M handled all materials with ease. It has increased production by approximately 30%. A single individual was able to increase his output from 200 to 300 pallets per day, very impressive. Overall its proven itself as a money maker for the company.  
**- Steven Streeter: Enpac Pallets & Crates Inc.**

## The better alternative for pallet recyclers

### More power, less weight & better durability.

For driving nails 1-3/4" to 2" with diameters .083" to .090", we proudly introduce the new Tech PCN-55M nailer.

After many years of experience working with pallet recyclers, we've designed our new tool with features like a thicker reinforced nose and contact arm for extra durability, and air flow that is optimized to generate more power with less weight - a third to a half a pound lighter than competitive tools.

Our customers also report that the new PCN-55M holds up better in colder winter temperatures.

# Bandsaw Pallet Dismantlers

We run 7 PRS PROSAW band saws in our facility. Each machine dismantles between 800-1000 pallets per shift. We recently replaced 3 (14 year old) PRS PROSAWS and will definitely buy PRS in the future.

# Pallet Assembly Solutions from Mona Tracy...

## Thinking About Buying A Nailing System?

### Universal Gives You Choices...

#### New Universal In-Line Nailing System! Serious Stringer Pallet Production Is Now Available...

- Produces 1,200 pallets per day
- Eliminates use of hydraulic fluid for operation
- Up to standard size 64"x 84" pallet as its basic design (other size options available)
- Less air controls • Two or three man operation
- Fully automatic stacker • PLC controlled, no pneumatic switches

**This Nailer Is Your  
"NEXT STEP UP"  
In Production!**

*Exclusively designed  
for Universal Machinery  
by JSB Industrial Solutions, Inc.*

#### NAIL-MATE II Flat Table/Manual Handling

- For standard and larger size pallets

#### The "REVO" Revolving Work Station

- For New Pallets, Recycling or Reman jobs

**Block Pallet  
Attachment  
Available!**

#### The "NAIL EASE"

- Assembles all size pallets (up to 50" x 50") with easy adjustments
- For New & Recycled lumber

**Fast, Easy  
Assembly  
of Any Size  
Pallets!**

#### NAIL-MATE Automatic Nailing Jig

- 12 years proven in the industry
- Auto firing, one-man operation
- Handles 3 or 4-stringer pallets, wing pallets or others up to 56" x 50" at a rate of 1-2 pallets per minute!

#### The Nailing Station

- Hold down system and swivel turn over for nailing both sides

#### JAM DOCTOR

- Clears Nail Jams!

# HOT ON THE MARKET!

## Digital Indicator Back Gauge

Tired of having to squint to see the small lines on your dial indicator? This new gauge, exclusively from **Hanchett Manufacturing**, is easy to read and helps make benching your bandsaws much quicker! Now you can see your back measurement instantly. Available in 3, 4 and 5 foot lengths, in standard or reverse options. The gauge includes a free reset bar to zero your gauge!

For more information, contact:

**Hanchett Mfg.**  
800-454-7463

## Pneumatic Single Head Notcher

**Morgan Chop Saw** has introduced a new Single Head Notcher. This notcher **doubles your production** by running two stringers at a time. Air powered for speed and convenience, it features a 15 HP 3-phase motor and is mounted on four heavy duty lockable casters so it can be easily moved around your shop. The notching head is covered at all times for maximum safety, and offers very few moving parts for additional safety and durability. Its easy access to the machine's components means less downtime. Big production, durability and convenience--what more do you need in a notcher?
