Childhaven Annual Appeal

What Will Your Thanksgiving Day Be Like This Year?

Every day at Childhaven we see two realities:

- Bruises** on the outside
- Invisible scars** on the inside

In a nutshell, this describes the children and families served by the Childhaven ministries.

A young Mom visited us a short time ago. She grew up at Childhaven. She and her family just moved, and she is working hard to get "settled in," already volunteering and teaching at church, getting involved in a Mom's group, and supporting her children's activities. We are proud of her.

Another comes to visit often, and you know immediately if things are well, or not... She just recently launched out on her own, in her own apartment, working while looking for a better job. Life is not always easy, and those invisible scars are still around. She has no family in her life. We are her family.

Our work with struggling families is literally touching hundreds of souls each year. Our family preservation and reunification ministry is successful 88% of the time. This means that children are living at home, where God intends for them to be. We are making a real difference.

Your support makes it possible. At this time of our annual Thanksgiving Appeal, please be as generous as possible. Your gift of \$500 would provide clothing allowances for a home of residents for one month, and your gift of \$1,000 would provide utilities for six weeks. A gift of \$5,000 would provide food for one home for six months. A gift of \$50 would pay for a week's worth of tutoring for one resident.

Through a new partnership with ACCESS cards, your on-line donation of \$25 or more provides an ACCESS card giving you immediate discounts with both local and national retailers. Go to www.childhaven.com and click on the donate button, or mail your gift to P.O. Box 2070, Cullman AL 35056-2070

Thank you in advance for your gifts. Contributions make up most of Childhaven's income.

Call 256-734-6720 for more information.

In patients with a sore throat that didn't require immediate antibiotics, a single capsule of the corticosteroid dexamethasone didn't increase the likelihood of complete symptom resolution after 24 hours, and although more patients taking the steroid reported feeling completely better after 48 hours, a role for steroids to treat sore throats in primary care is uncertain, according to a study published by JAMA. Acute sore throat is one of the most common symptoms among patients presenting to primary care. Adults in the United States made an estimated 92 million visits to doctors for sore throats between 1997 and 2010, an average of 6.6 million visits annually.

Although glucocorticoid therapy is widely used to treat inflammatory conditions, it can lead to rapid bone loss and is associated with an increased rate of fracture. Among older patients using medium to high doses of the anti-inflammatory steroid prednisolone, treatment with the osteoporosis drug alendronate was associated with a significantly lower risk of hip fracture, according to a study published by JAMA.

A new study published in the Journal of the Association for Research in Otolaryngology has found that oral promethazine, a drug commonly taken to alleviate motion sickness, temporarily worsened vestibular perception thresholds by 31 percent, lowering one's ability to perceive sensory information about motion, balance and spatial orientation. These findings suggest that people taking the medication should take extra precautions to prevent falls, since shifts in vestibular perception thresholds are associated with poorer performance on standardized balance tests.
