What Can An L-M Verticut "P4" System Do For You?

- ➔ P.E.T. Cutting Tolerance of +/- 1/32" Accuracy
- ➔ Precision Linear Bearing Guide System
- ➔ Self Cleaning Carriage Drive System
- ➔ Wireless Remote Control Starting

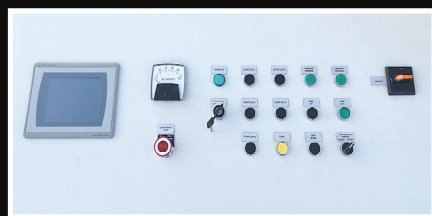

*Our Most Accurate
Package Cross Cut System!*

"P4" — Performance Production Precision Profit
"FACT" Controls — Fast Advance Cutting Technology

*"We have bought a lot of equipment over the years.
The Verticut P4 is BY FAR the best!
My only regret is not doing it sooner."*

— Sean Montey
Owner, American Pallet in Oakdale, CA

- ➔ Programmable touch screen for easy operation.
- ➔ Dual language available.

**We'll Show You Why We're the
#1 Package Cross Cut System Manufacturer
in North America!**

TO MAKE EVERY DOLLAR COUNT— YOU HAVE TO MAKE EVERY CUT COUNT

Selecut® V with **Inline Squeeze**

- For prime lumber cut to length or Precision End Trimming needs, our Selecut®-V uses a Fixed Frame Assembly with a moveable cutting platform to meet your production needs in a limited space environment and is available with our Inline Power-Squeeze Package Alignment system.
- For high-volume automated crosscutting of industrial length stock, our Autocut®-V uses a computerized carriage assembly with PLC controls enabling you to process lumber without an operator present.

Transcut® II Station

from \$26,999*

Transcut® II Portable

from \$7,999*

Autocut® V

- For custom manufacturers, our Transcut® II Station will cleanly cut through a unit of hardwood or softwood in less than a minute using generic chain-saw chain and with a precision of +/- 1/16th" or better*.
- For simple crosscutting of EWP or lumber, our versatile Transcut® Portable saws are priced and designed to offer a significantly safer and faster alternative to hand-held chain saws.

We're proud of the fact that HOLTEC pioneered the concept of precise package cutting over 40 years ago. Today our industry's technological and manufacturing advances have enabled us to achieve the fastest cut in the industry and an unmatched precision on every cut. So, if you're considering investing in a package-crosscut saw, consider these facts*:

- At 55 seconds per cut HOLTEC systems cut up to twice as fast as other systems available today;
- With our own team of dedicated Field Technicians and service vehicles, HOLTEC is the only company that provides you a service response time of 24 hours or less on-site and on-time;
- Our state of the art Germany manufacturing facilities are ISO-9001 certified, ensuring that you're getting the highest quality manufacturing standards available today;
- With an unmatched precision of +/- 1mm (.040"), HOLTEC systems exceed precision-end-trim tolerances;
- HOLTEC systems are designed with the highest safety standards in the world, ensuring that your employees are working in the safest environment for package-crosscutting available today;
- HOLTEC has almost 2,000 systems in North America and over 8,000 systems delivered worldwide, ensuring that we'll be here for you in the future as we have been for the last 40 years

WE ENSURE EVERY DOLLAR COUNTS BY ENSURING EVERY CUT COUNTS

SIMONDS®

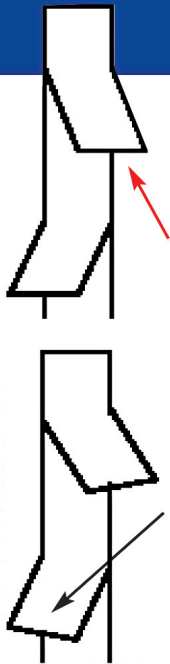

PreSharp™

IS REAL SHARP!

PreSharp™ IS AVAILABLE IN 3 WIDTHS:

- 1" OS wide • 1-1/4" wide • 1-1/2" wide

Not all Ground Tooth blades are created equal!

PreSharp™
SQUARE FACE BLADE DETAIL

Simonds PreSharp™ blades have a unique, square-face cutting edge.

Conventional blades, even "ground tooth" types, have a twist on the face. This twist pushes saw dust to the sides of the blade, potentially causing poor tracking and dust spillage.

BANDSAW BLADES FOR ALL CUTTING APPLICATIONS

MAKE SIMONDS YOUR SOURCE FOR PORTABLE SAWMILL BLADES, FIREWOOD PROCESSING SAWS, SAW TEETH, & CHIPPER KNIVES.

“We just run ‘em”

“... I bought my first Cleereman at auction in '94, it was about 18 years old and we just ran it. Then I bought the first new Cleereman in '98. Running Cleereman carriages has been one of the greatest decisions that I've made in my entire career because they just run... Cleereman is a great product, with great service, with nearly zero downtime and parts that are reasonably priced and available within 24 hours. And you can't ask for better people to deal with, that's Why I Never Looked Back.”

Ed Robbins
Ohio Valley Veneer

Currently running six Cleereman Carriages with a LumberPro on order.

★★★★★
RECENT HURDLE HEAVYWEIGHT MILLS SOLD

"We currently run four Hurdle mills and they give us the versatility to cut cants, ties, grade, and feed our thin-kerf resaws ... Hurdle has been a big part of our success for the last 25 years. You could spend 4 or 5 million dollars building a mill to square logs for a resaw, but why? Hurdle is the MOST cost effective headsaw, no other sawmill can produce like this and keep total capital investment this low!"
 Brandon Clark, Clark Lumber Company

"When sourcing machinery for a new mill, I was looking for quick delivery, reliability, productivity, and support. Hurdle met my expectations and their parts support is excellent."
 F.S. Beal, Beal Lumber Company, Inc

No-Spill, Gentle Loading of Firewood or Mulch

Gentle loading

The operator controls how fast the drop bottom doors open as the hopper is raised.

Loading complete

All action is controlled from the operator's seat. Faster, easier and safer. No damage, no complaints.

"We really like Iron Bull's EZ-Load Hopper for loading firewood. It does it better and gentler than a front end loader."
 -Jac Siemens, Southeast Pallet & Wood Products, Blumenort, Manitoba, CA

"Our customers are impressed."
 Elam Swarey Jr, Parke County Firewood, LLC

Reduce the risk of damaging your customer's vehicle. The Iron Bull EZ-Load Hopper loads firewood gently and safely. Customers love it when you're easy on their trucks or trailers. With conventional hoppers or front end loaders, you have to be an expert operator to get it positioned just right. Now with the new EZ-Load Hopper, almost any operator can load a pickup without sending firewood pieces flying. Also great for loading mulch.

Call today for more information.

"Your Lumber Store!"

Try our tool risk free for 30 days!

NEW Tech® PCN-55M

TECH

The better alternative for pallet recyclers
More power, less weight & better durability.

For driving nails 1-3/4" to 2" with diameters .083" to .090", we proudly introduce the new Tech PCN-55M nailer.

After many years of experience working with pallet recyclers, we've designed our new tool with features like a thicker reinforced nose and contact arm for extra durability, and air flow that is optimized to generate more power with less weight - a third to a half a pound lighter than competitive tools.

Our customers also report that the new PCN-55M holds up better in colder winter temperatures.

Although nail pricing is one component when choosing a company, an even greater consideration for us is the nail guns. Being a recycler, wood density varies from softwood to rock hardwood. The Tech 55M handled all materials with ease. It has increased production by approximately 30%. A single individual was able to increase his output from 200 to 300 pallets per day, very impressive. Overall its proven itself as a money maker for the company.

DISMANTLE MORE PALLETS PER BLADE. PERIOD.

NEW! PALLET HAWG® PALLET DISMANTLING BANDSAW

60" width capacity—up to 96" available!

Adjustable table height with 5 1/4" travel

Designed for a full range of pallet recycling including pallet prep, repair, dismantle, and recovery, the Pallet Hawg® Pallet Dismantler from Wood-Mizer has earned a worldwide reputation for being **extremely durable and reliable through simple and innovative engineering**. Due to the unique combination of high torque and low RPMs with a bi-metal blade, the Pallet Hawg® has an expected blade life of **1,200 to 1,500 dismantled pallets per blade** which is nearly double the blade life of competitive pallet dismantling saws. With **one or two operators**, easily remove stringer boards, blocks, and deck boards of a pallet with the Pallet Hawg® from Wood-Mizer.

FEATURES

No fail mechanical blade tension system

10 hp motor with gear reduction drive

Pneumatic hand valve moves table up and down

NEW! Center board drop option

SMART PRODUCTS

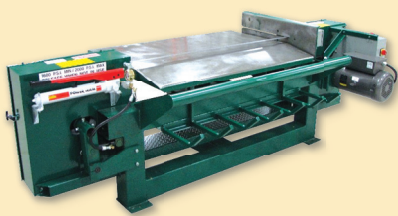

Is Your Answer! For Pallet Lumber Recovery and Repair Solutions.

"The Difference is Engineering"

Leasing & Financing Alternatives Available

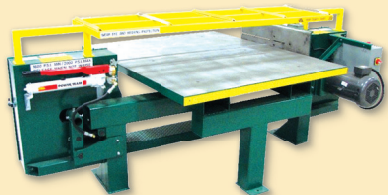

Dismantlers

One-Man Dismantler

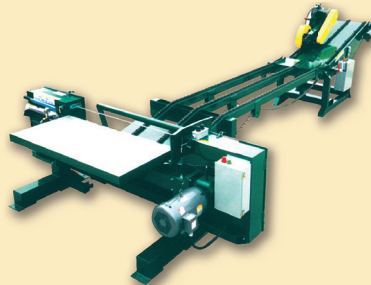

- 52" or 64" capacity
- 10 HP, 3-phase, electric motor standard (2200 FPM blade speed) (single phase available)
- Optional 15 HP, 3-phase (4400 FPM blade speed) electric motor available
- 18 HP gas-powered electric start on Portable Dismantler
- Gear reduction drive
- Self-contained hydraulic blade tensioning
- Low maintenance durable blade guide bearings
- Push button operated table height adjustment

Two-Man Dismantler

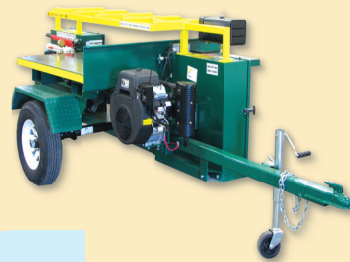

Pallet Dismantler System

- 64" capacity **Front Discharge** Dismantler
- Linear accumulating conveyor feeds boards easily to operator of Inclined Power Trim Saw
- Add additional dismantlers for higher production

Portable Dismantler

Notchers

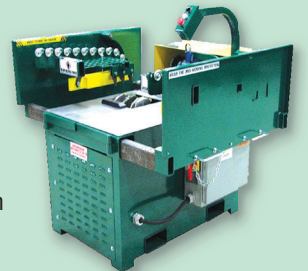

Double Head Notcher

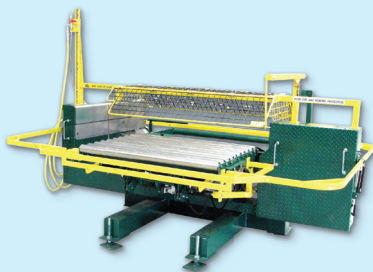

- Two, 20 HP, three (3) phase, electric motors with V-belt driven indexable notching cutterheads
- One-person operation/1,000 double notched stringers per hour
- Notches new or recycled lumber
- 48" to 96" stringer capacity standard
- 9" x 1-1/2" notches, with 18" between notches
- Quick set-up
- Continuous power feed system
- Self exhaust design (useful when notching recycled material)

Single Head Notcher

- 20 HP, three (3) phase, electric motors with V-belt driven indexable notching cutterhead
- One-man operation/500 double notched stringers per hour
- Notches new or recycled lumber
- 72" stringer capacity standard
- Quick set-up
- Continuous power feed system
- Self exhaust design (useful when notching recycled material)

Pallet Prep

- Commonly referred to as the "SmartSaw"
- Smart Saw is **multifunctional**: designed for repair (1 person) or recycling (2 person) operations of BLOCK or GMA/STRINGER pallets
- Standard 10 HP, 3-phase, electric motor with gear reduction drive
- 20' standard **M42 bi-metal** band saw blade
- Air actuated, 3-position, roller table and table extension easily positions pallet for board removal
- Machine provided with **advanced safety measures** in place, including interlock switches for perimeter guarding and cabinet doors
- Improved **canopy guarding**, with front and rear portions that move up and down with the roller table

- Specifically designed to QUICKLY (as a **1-person** operation) cut out damaged boards, including **top and bottom** deck boards, as well as **connector** and **stringer** boards
- Also designed, as a **2-person** operation, to process the disassembly / tear-down of block or stringer pallets for **INCREASED LUMBER RECOVERY**. For block style machine, includes a specially designed **Block Recovery Tool** (or BRT) that **salvages blocks** now being scrapped with other machines and processes

Double End Power Feed Trim Saw

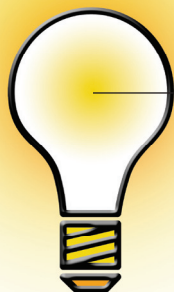

Trim Saws

- Power Feed Trim Saws trim boards 2" thick from 18" - 60" in length on the single end, and 18" - 66" in length on the double end
- Inclined board feed and overhead saw design help eliminate board kickback
- Manual Trim Saw handles boards up to 6" thick and 6" wide
- 18" diameter nail resistant saw blades and 10 HP motors
- Heavy duty steel tube construction
- Multiple adjustable board stops on Single End and on Manual Feed Trim Saws
- Easy blade change
- Easily moved with built-in fork lift pockets
- Right saw head on double end easily adjusts to cut desired board length

Single End Power Feed Trim Saw

Manual Feed Trim Saw

OUR UNIQUE & INNOVATIVE WOOD DRYING PROCESS DELIVERS RESULTS

BRIGHTER LUMBER MEANS HIGHER SALES

Nova Dry Kiln's innovative technology offers a unique drying method that is kinder and gentler to the wood drying process. This process results in brighter lumber and gives our customers higher sales. Nova Dry Kiln builds and designs medium and large kilns ranging from 5,500 to 120,000 or more board feet.

TIMBER DRY MANAGEMENT CONTROLS OFFER FLEXIBILITY AND EASE OF USE

When using the Timber Dry Management System kiln operators have a straight forward, simple to use, flexible program. Kiln operators can make instant changes on the touch screen interface that is provided for each individual kiln. This drying control technology uses the exclusive proven and cost-saving Nova Dry Kiln methodology.

INNOVATIVE TECHNOLOGY SAVES MONEY ON UTILITIES AND DEGRADE

Our kilns not only save money on utilities but our customers experience end results of only a 1 to 1 1/2% degrade. Using the combination of a thermal blanket created from our heated floors, with fans that do not reverse rewetting the lumber surface, also moisture is not reintroduced into the drying chamber for humidity control or conditioning, to the aluminum-lined walls that offer a superbly insulated chamber, the Nova Dry Kiln saves you money on your utilities and provides you with a superior end product and in most cases only a 1 to 1 1/2% degrade.

CONTACT US FOR FURTHER DETAILS

We provide turnkey construction services along with excellent customer service as part of our dry solutions. Call our technical staff today for further information about Nova Dry Kiln and our Timber Dry Management system.

The Longest Lasting Debarker Head on the Market!

Why? Cutting Edge technology allows the carbide teeth to be indexed up to 6 times before they need replacing. That saves you money!

- 12" & 15" models
- Solidly constructed with All Steel bodies

The Bark-King Depth Control bearing can be used on many Rosserhead debarking heads to provide excellent control of the debarking process by preserving wood fiber.

Again — this saves you money!

See us at IHLA
Indianapolis, IN
February 6-8th
Booths 302-304

So, get the #1 performing head on the market AND save money!

HOT ON THE MARKET!

Horizontal Grinder Remote Monitoring System

Rotochopper's 2017 Demo Day featured the introduction of the RotoLink 2nd generation remote monitoring system with live connection to the grinder controller and Rotochopper Customer Service. Work in real-time with Rotochopper Customer Support to view machine settings and troubleshoot issues. Using RotoLink multiple users can work together through live connection on smartphones or computers to monitor and adjust critical machine settings from anywhere in the world. Monitoring capabilities include maintenance life, vibration and bearing temperatures, engine data and production data. When granted access, factory service techs have a direct connection to the display and with permission can change machine settings.

Easily connect RotoLink and your grinder through cell modem, ethernet or Wi-Fi. Data logged during operation and diagnostics is available to machine owners for the life of the machine. RotoLink is available for both diesel and electric horizontal grinders. Use RotoLink remote monitoring system to troubleshoot and maximize machine performance.

Pallet Board Edger

It's back! The Little Champ Edger, designed and built by the Morgan family, is being offered again by **Universal Machinery Sales**. The popular machine, with its simple design and easy operation, will edge 3 1/2" to 16" wide boards in 1/8" increments. It handles thicknesses of 2 1/4" and will pass 30" wide flitches.

This edger features adjustable split blades for easy removal and versatility. Other standard features include powered 18" in and outfeed conveyors, variable speed up to 100 fpm, spring-loaded hold downs, 12" carbide tipped strobe blade and your choice of single or 3-phase power. It's the do-it-all edger you've been looking for!

MORBARK® ANNOUNCES ACQUISITION OF RAYCO MANUFACTURING

Morbark, LLC announced today it had completed the acquisition of Rayco Manufacturing, Inc. This transaction represents the first addition since affiliates of the private equity firm Stellex Capital Management LP (Stellex) acquired Morbark in 2016. The purchase of Rayco represents a significant move towards the company's strategic focus on broadening the range of tree care and industrial equipment, aftermarket parts, and service offered to their Customers.

The transaction is a positive, strategic fit for both companies. Rayco brings a lineup of innovative equipment into the Morbark family across multiple product categories. In particular, Rayco stump cutters, aerial trimmers, forestry mulchers and crawler trucks will enhance and complement the existing Morbark family of products. Morbark will operate Rayco as a new division maintaining its brand identity. Rayco's experienced management team will continue to manage their operations. Teams from each company will work together to determine how to be more efficient and leverage each other's strengths.

Morbark, LLC, based in Winn, Mich., has been innovating and manufacturing durable, high-performance equipment for forestry, recycling, tree care, sawmill and biomass markets for more than 60 years. The company produces a full line of whole tree and waste wood chippers, flails, brush chippers, horizontal and tub grinders, sawmill equipment, material handling systems and more.

For more information, please visit www.morbark.com or www.raycomfg.com.
