Once Upon A Time....

There was an owner of a very successful hot dog stand. This owner built his business by having the best hot dogs around and by letting his customers know about them through extensive advertising. His business was so successful that he was able to send his son to a prestigious Ivy League school where his son was studying to receive his M.B.A.

One day the son came home for a break and promptly questioned his father "Dad, don't you know that there is a recession going on out there?" The father replied that his business was going very well, but the son persisted telling his father "Dad, you've got to cut back." So the father, figuring his son knew all about business, followed the son's advice. He promptly cut his advertising budget and then cut his hot dog & bun orders. Before long, business in fact did slow down. So the father replied to the son "You were right, son. Business is terrible. There is a recession going on out there."

Recipe

STUFFED CAMEL

- | | |
|--------------------------------|------------------------|
| 1 Whole Camel, Medium Size | 2 Kilos Almonds |
| 1 Whole Lamb, Large Size | 1 Kilos Pistachio Nuts |
| 20 Whole Chickens, Medium Size | 110 Gallons Water |
| 60 Eggs | 5 Tbsps. Black Pepper |
| 12 Kilos Rice | Salt To Taste |
| 2 Kilos Pine Nuts | |

Skin, trim and clean the camel, lamb, and chickens, and boil until tender. (Be sure the pot is large enough). Cook rice until fluffed. Fry nuts until brown, and mix with rice. Hard-boil the eggs and peel them. Stuff the chickens with eggs and rice. Stuff the lamb with five of the chickens and some rice. Stuff the camel with the lamb and more rice. Broil in large oven until brown. Spread the remaining mixed rice on a large tray and place the camel on top. Place the remaining stuffed chickens around the camel. Decorate rice with boiled eggs and nuts. And don't worry if there are more quests than expected - the recipe serves 80 to 100.

Here's How It Works:
Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!
