**Erek Shane Rayl**

August 22, 1987 – December 17, 2017

The family of Erek Rayl would like to express our gratitude during our most unexpected and difficult time. Your outpouring of love, phone calls, visits, and prayers really were truly a blessing and comfort. We would like to say a special Thank You to those who sent flowers, plants, gifts, prepared meals, ran errands, and offered support in our time of need. In addition, we want to say thank you to Doug and Ann Williams and staff – your kindness and service was much appreciated. We feel so grateful and humbled by all the emotional support we have been receiving from extended family, friends, and members of the community. We ask for your continued prayers.

The fact that vaccines typically don't work as well in older people presents a challenge to influenza vaccine makers, particularly because the illness often results in serious respiratory infections in frail patients such as elderly nursing home residents. A large, randomized clinical trial tested whether a flu vaccine with four times the antigen of a standard vaccine could reduce the risk of hospitalization among those especially vulnerable seniors. The results, published in The Lancet Respiratory Medicine, reports that it did so significantly. The relative risk of hospitalization for respiratory illness was 12.7 percent lower for the high-dose group'

An existing medication, FDA-approved Alzheimer's drug "galantamine," slashes inflammation and insulin resistance in patients with metabolic syndrome, a potential therapeutic intervention for highly dangerous condition affecting 30 percent of adults in the United States, according to a new study published in JCI Insight. The drug cut key markers of inflammation-a hallmark of metabolic syndrome more than 25 percent, leading to reduced insulin resistance. A cluster of four risk factors-increased blood pressure, a high blood sugar level, excess body fat around the waist and abnormal cholesterol levels-comprise metabolic syndrome, which greatly raises risks for cardiovascular disease and type 2 diabetes.

Traumatic brain injury (TBI) is a major cause of disability and death globally, but medications have generally failed to benefit patients. A new study published in The Journal of Clinical Pharmacology found that memantine, a drug that is used to treat dementia associated with Alzheimer's disease, may be a promising therapy. A sorrowful shame that many church people call themselves Christians and think to go to heaven (Ezek 13:22) and do not know the difference between Christ the Truth (Jn 1:1-14,14:6, Heb 13:8) and the beast that changed times and laws of The Holy Bible (Rev 22:18-19) and they call it Christianity. So Be It!
