### How Does Hypnosis Work?

Hypnosis is a safe and effective tool in helping you accomplish your goals. Some frequently asked questions about hypnosis:

1. Can everyone be hypnotized? No. If you are below normal intelligence, psychotic or

- under the age of 4 it is hard to be hypnotized.
2. Do you lose consciousness? No. You will be even more awake during hypnosis than before. Hypnosis is not sleep.
3. Do you surrender your will? No. Under hypnosis you are

- capable of making decisions at all times.
4. Must you be weak minded to be hypnotized? No. Hypnosis requires concentration, the more intelligent you are, the easier it is for you to be hypnotized.

5. Do you reveal secrets? No. You are totally aware of everything while being hypnotized, including what you say.
6. Does everyone come out of hypnosis? YES! You can readily revive yourself at any time. You are in control.
7. What does hypnosis feel like? Many people feel extremely relaxed but fully aware during a hypnosis session.
8. How does hypnosis work? Hypnosis works with your subconscious. During a hypnosis session you are given positive and beneficial suggestions while in a trance state. Your subconscious hears the suggestions being given to you by the hypnotist. However, it is up to you to accept or decline these suggestions. Remember, you are always in control. You don't have to do it alone. For more information contact Lori Kleinsmith, Certified Hypnotist and owner of Pinnacle Hypnosis and Therapies.
