DISCOVERER A/T3™

All-Season All-Terrain

The Discoverer A/T3™ is an all-season, all-terrain tire designed to perform well on the highway and off for drivers of pickup trucks.

- Excellent highway performance
- Excellent wet traction
- Improved treadwear and traction in rocky and gravel terrain

Overland Journal Editors' Choice & Value Awards

WIDE CIRCUMFERENTIAL GROOVES
Improves soft surface traction, aids in the tires' ability to clean itself, resistance to hydroplaning and stone retention.

AGGRESSIVE 5-RIB ALL-TERRAIN DESIGN
For all-terrain performance, all-season traction, stability, handling and treadwear.

COUPLED TREAD ELEMENTS
Excellent stability and confident handling.

NO OTHER MACHINE RAISES THE BAR SO HIGH.

When it comes to precision engineering, the Kubota SSV75 stands head and shoulders above all the rest. A hinge pin height of 128.3 inches provides a reach other skid loaders can only wish for. The proven 74.3 HP Kubota engine adds the muscle, with 5,884 pounds of breakout force. And a wider 36-inch cab entrance, optimized AC and full-suspension seat take productivity to a whole new level.

2017 Drinking Water Quality Report

Public Water Supply Identification (PWSID) Number is 3060041

Spanish (Español)

Este informe contiene información muy importante sobre la calidad de su agua beber. Tradúscalo o hable con alguien que lo entienda bien.

Is my water safe?

We are pleased to present this year's Annual Water Quality Report (Consumer Confidence Report) as required by the Safe Drinking Water Act (SDWA). This report is designed to provide details about where your water comes from, what it contains, and how it compares to standards set by regulatory agencies. This report is a snapshot of last year's water quality. We are committed to providing you with information because informed customers are our best allies.

Do I need to take special precautions?

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Water Drinking Hotline (800-426-4791).

Where does my water come from?

Our water source consists of four ground water wells known as Wells 1, 2, 3A and 4 located on what is known as the Borough Farm.

Source Water Assessment and Its Availability

The Northeast Berks County Wellhead Protection Plan was completed in 2008. The plan has found that our well sources are potentially most susceptible to agricultural activities and transportation corridors. Overall, our sources have a high risk of significant contamination. Complete reports were distributed to municipalities, water suppliers, local planning agencies and PADEP offices. Copies of the complete report are available for review at the PADEP Southcentral Regional Office at (717) 705-4700.

Why are there contaminants in my drinking water?

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's (EPA) Safe Drinking Water Hotline (800-426-4791). The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity: microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife; inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm water runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming; pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses; organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems; and radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities. In order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. Food and Drug Administration (FDA) regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

How can I get involved?

We, at the Borough of Kutztown and the Kutztown Municipal Authority, work around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future. If you have any questions about this report or concerning your water utility, please contact Troy Smith, Water Plant Manager, at 610-683-5962. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled Water/Wastewater committee meetings. They are held on the second Wednesday of the month, at 7:30 PM at 45 Railroad Street, Kutztown.

Borough of Kutztown, 45 Railroad Street, Kutztown, PA 19530
 Phone: (610) 683-6131 Fax: (610) 683-6729 Email: admin@kutztownboro.org

Description of Water Treatment Process

Your water is treated by filtration and disinfection. Filtration removes particles suspended in the source water. Particles typically include clays and silts, natural organic matter, iron and manganese, and microorganisms. Your water is also treated by disinfection. Disinfection involves the addition of chlorine or other disinfectants to kill bacteria and other microorganisms (viruses, cysts, etc.) that may be in the water. Disinfection is considered to be one of the major public health advances of the 20th century.

Monitoring and Reporting of Compliance Data Violations

In May we had a Monitoring/Reporting violation for failure to report SOC samples on time. The samples were taken by the Borough of Kutztown and sent to the testing lab in a timely manner, however due to problems at our testing lab, the sample for Endothall had to be retaken 3 times and therefore the result was reported late resulting in the violation. In November we had a Monitoring/Reporting violation for failure to report TTHM samples on time. Again the samples were taken by the Borough of Kutztown and sent to the testing lab in a timely matter. Due to equipment failure at the testing lab the sample was not analyzed and reported in the required time frame. The Borough did retake the sample and it was analyzed by the lab and the results were reported to PADEP outside of the required time frame resulting in the violation.

Additional Information for Lead

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Borough of Kutztown and the Kutztown Municipal Authority is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

Water Quality Data Table

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of contaminants in water provided by public water systems. The table below lists all of the drinking water contaminants that we detected during the calendar year of this report. Although many more contaminants were tested, only those substances listed below were found in your water. All sources of drinking water contain some naturally occurring contaminants. At low levels, these substances are generally not harmful in our drinking water. Removing all contaminants would be extremely expensive, and in most cases, would not provide increased protection of public health. A few naturally occurring minerals may actually improve the taste of drinking water and have nutritional value at low levels. Unless otherwise noted, the data presented in this table is from testing done in the calendar year of the report. The EPA or the State requires us to monitor for certain contaminants less than once per year because the concentrations of these contaminants do not vary significantly from year to year, or the system is not considered vulnerable to this type of contamination. As such, some of our data, though representative, may be more than one year old. In this table you will find terms and abbreviations that might not be familiar to you. To help you better understand these terms, we have provided the definitions beside the table.

Contaminants	MCLG or MRDLG	MCL, TT, or MRDL	Detect In Your Water	Range		Sample Date	Violation	Typical Source
				Low	High			
Disinfectants & Disinfection By-Products								
(There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants)								
Chlorine (as Cl ₂) (ppm)	4	4	.76	.4	.76	2017	No	Water additive used to control microbes
Haloacetic Acids (HAA5) (ppb)	NA	60	7.15	NA	7.15	2017	No	By-product of drinking water chlorination
TTHMs [Total Trihalomethanes] (ppb)	NA	80	18.8	7.2	18.8	2017	No	By-product of drinking water disinfection
Total Organic Carbon (% Removal)	NA	TT	NA	NA	NA	2017	No	Naturally present in the environment

Unit Descriptions	
Term	Definition
ppm	parts per million, or milligrams per liter (mg/L)
ppb	parts per billion, or micrograms per liter (µg/L)
NTU	Nephelometric Turbidity Units. Turbidity is a measure of the cloudiness of the water. We monitor it because it is a good indicator of the effectiveness of our filtration system.
NA	Not applicable
ND	Not detected
NR	Monitoring not required, but recommended.

Contaminants	MCLG or MRDLG	MCL, TT, or MRDL	Detect In Your Water	Range		Sample Date	Violation	Typical Source
				Low	High			
Inorganic Contaminants								
Barium (ppm)	2	2	.033	0	.033	2015	No	Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits
Chromium (ppb)	100	100	2	0	2	2015	No	Discharge from steel and pulp mills; Erosion of natural deposits
Nitrate [measured as Nitrogen] (ppm)	10	10	4.79	2.87	4.79	2017	No	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits

Important Drinking Water Definitions	
Term	Definition
MCLG	Maximum Contaminant Level Goal: The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
MCL	Maximum Contaminant Level: The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
TT	Treatment Technique: A required process intended to reduce the level of a contaminant in drinking water.
AL	Action Level: The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.
Variances and Exemptions	State or EPA permission not to meet an MCL or a treatment technique under certain conditions.
MRDLG	Maximum residual disinfection level goal. The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
MRDL	Maximum residual disinfectant level. The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
MNR	Monitored Not Regulated
MPL	State Assigned Maximum Permissible Level

100% of the samples were below the TT value of .3. A value less than 95% constitutes a TT violation. The highest single measurement was .3. Any measurement in excess of 1 is a violation unless otherwise approved by the state.

Contaminants	MCLG	AL	Your Water	Sample Date	# Samples Exceeding AL	Exceeds AL	Typical Source
Inorganic Contaminants							
Copper - action level at consumer taps (ppm)	1.3	1.3	.26	2016	0	No	Corrosion of household plumbing systems; Erosion of natural deposits
Inorganic Contaminants							
Lead - action level at consumer taps (ppb)	0	15	11	2016	2	No	Corrosion of household plumbing systems; Erosion of natural deposits

What Are Manual Lymphatic Drainage Treatments And Aqua Foot Detox Sessions?

Manual lymphatic drainage treatment (clients remain clothed) is a light, non-invasive delicate touch, paired with rhythmic movements. It is relaxing, calming and encourages a pain-free release of inflammation and ease on joints in general helping to create a greater ease of breath and lighter feeling over all. Additional benefits? Stimulates flow of oxygen and nutrients to the cells Reduces inflammation and irregularities of skin cells

Boosts tissue regeneration after surgery and reduces swelling Restored equilibrium, encouraging regular lymph flow Increase overall mobility of the body, eases joint congestion Promotes the body's immunological response It is great for those who suffer from hypertension, fibromyalgia in addition to forms of anxiety, by calming the nervous system. For pregnant women; gently decreases liquid retention leading up to childbirth as well as relief and skin healing post labor. 60, 90 and 120 minute sessions are available. Cassie Eshelman, Manual Lymphatic Drainage Practitioner will be at Pinnacle Hypnosis and Therapies on Wednesday, July 11 starting at 8 am. If you would like to schedule a session with Cassie, please book early. June sessions filled quickly. The Aqua Foot Detox™ System produces a charge that stimulates the cells within the body. The positive and negative charges in the water allow the body to attract and use the negative ions to rebalance and release toxins. The most convenient and effective way to release these toxins is through the 4000 pores on the feet. Your body will continue to detoxify for up to 48 hours after a session. The water contains a saline solution and an electro magnetic device called an array. That is it! Research has shown that the benefits of those receiving treatment have had increased: Vitality, Circulation, Energy Levels, Organ Energy, Sense of Well Being, Nutrient Absorption.

READER'S Recipe

GRILLED VEGETABLES WITH CILANTRO-YOGURT DRESSING

2 cups plain Greek yogurt
1/4 cup finely chopped fresh cilantro
juice of 1 lime
1 clove garlic, grated
3 to 4 dashed hot sauce
salt & ground black pepper

4 zucchini, cut into long slices
4 yellow squash, cut into long slices
1 eggplant, cut into long slices
2 red onions, peeled & sliced
12 cremini mushrooms, halved
olive oil, for brushing

Make the yogurt sauce by combining the yogurt, cilantro, lime juice, garlic, hot sauce, salt and pepper in a bowl. Refrigerate until you need it. Brush the sliced zucchini, yellow squash, eggplant, onions and mushrooms with olive oil and sprinkle with salt and pepper. Grill in batches until soft & tender, about 4 minutes per side. Arrange the grilled veggies on a platter and serve with the sauce.
